ABSTRACT

This document presents fiscal year 2003 budget recommendations for Illinois higher education operations, grants, and capital improvements. For operations and grants, general funds of \$2,789.2 million are recommended, an increase of \$100 million, or 3.7%. New funds are targeted to address the six goals of "The Illinois Commitment: Partnerships, Opportunities, and Excellence" with a focus on improving learning at all levels, enhancing the competitiveness of faculty and staff salaries, maintaining affordability, and meeting statutory funding requirements for the State Universities Retirement System. Capital improvement projects totaling \$443.7 million are recommended, focusing on projects to protect the state's investment in existing facilities and ensuring adequate facilities to training, instruction, and research. Chapter 1 contains an executive summary, and chapter 2 discusses implementing "The Illinois Commitment," the state's educational reform initiative. Chapters 3 through 8 outline the operations and grants budgets for institutions and agencies. Chapters 9 through 12 describe capital improvements projects. An appendix presents related higher education data. (Contains 49 tables.) (SLD)

BOARD OF HIGHER EDUCATION
STATE OF ILLINOIS

Members of the Board of Higher Education:

The following document presents fiscal year 2003 budget recommendations for higher education operations, grants, and capital improvements. For operations and grants, general funds of \$2,789.2 million are recommended, an increase of \$100.0 million, or 3.7 percent. New funds are targeted to address the six goals of *The Illinois Commitment: Partnerships, Opportunities, and Excellence* with particular focus on improving learning at all levels, enhancing competitiveness of faculty and staff salaries, maintaining affordability, and meeting statutory funding requirements for the State Universities Retirement System. Capital improvement projects totaling \$443.7 million are recommended, focusing on projects to protect the state's investment in existing facilities and ensuring adequate facilities for today's training, instruction, and research.

We are very proud of the national recognition that Illinois has received for the progress that has been made in the areas of affordability, preparation for, and participation in higher education. The high marks received by Illinois higher education in the report card released last year by the National Center for Public Policy and Higher Education affirm that the state has made a strong commitment and wise investment in higher education. We are grateful for the support provided by Governor Ryan and the Illinois General Assembly. Our success would not be possible without their support.

These recommendations were developed with the cooperation and advice of the colleges, universities, and higher education agencies that submitted requests of \$228.0 million in new state general funds for operations and grants and nearly \$1.1 billion for new capital improvement projects. From these requests, \$128.0 million in important campus programs and \$640.3 million in capital improvement projects are not included in these recommendations.

The recommendations assume modest increases in support from taxpayers and those paying tuition. The recommendations address the goals of the Board's strategic agenda – *The Illinois Commitment: Partnerships, Opportunities, and Excellence* – and position Illinois higher education to respond to the needs of students, employers, and the state for the next decade.

I urge your support of these recommendations as we move forward in implementing *The Illinois Commitment: Partnerships, Opportunities, and Excellence*.

A handwritten signature in cursive script, reading "Keith R. Sanders".

Keith R. Sanders
Executive Director

I. EXECUTIVE SUMMARY

The fiscal year 2003 budget recommendations were developed with a focus on the programs and activities necessary to continue to implement the goals of *The Illinois Commitment*, while also recognizing the state's current funding outlook and economic environment. The recommendations for operations and grants are summarized on Tables I-1 through I-4. The recommendations call for the state to invest a total of \$3,805.0 million for higher education operations and grants in fiscal year 2003, an increase of \$134.3 million, or 3.7 percent, over fiscal year 2002. The recommendations include \$2,789.2 million in state general funds, an increase of \$100.0 million, or 3.7 percent, over fiscal year 2002. Highlights of the recommendations follow.

- **\$1.7 million for higher education to help Illinois business and industry sustain strong economic growth**, including \$375,100 in general funds support for Community College Workforce Development Grants and Higher Education Cooperation Act (HECA) Workforce and Economic Development Grants. Income funds and other funds will support university academic programs, internships, and veterinary medicine research.
- **\$4.8 million for higher education to join elementary and secondary schools to improve teaching and learning at all levels**, including support for HECA Teacher, Learning, and Quality Grants, Illinois Financial Assistance Act grants, and Community College P-16/Accelerated College Enrollment Grants. Income funds will support university P-16 programs, teacher preparation programs, and alternative teacher certification programs.
- **\$25.8 million to ensure no Illinois citizen will be denied an opportunity for a college education because of financial need**, including \$20.1 million in general funds support for the Monetary Award Program, specifically to increase the maximum award, accommodate fiscal year 2003 tuition and fee increases, and address increased program demand. Income funds are also utilized to support campus student aid programs at the University of Illinois.
- **\$7.3 million for Illinois to increase the number and diversity of citizens completing training and education programs**, including \$1.5 million in general funds support for Adult Education, Postsecondary Career and Technical Education Grants, HECA Access and Diversity Grants, and other grant programs. Universities Income Funds will support expansion of Western Illinois University's education program offerings in the Quad Cities, and university programs for Hispanic Future Professionals, persons with disabilities, and student retention.
- **\$88.4 million for Illinois colleges and universities to hold students to even higher expectations for learning and to be accountable for the quality of academic programs and the assessment of learning**, including \$48.4 million in general funds support for salary increases at institutions and agencies, support for the Recruiting and Retaining Critical Faculty and Staff initiative, support for the operation of new facilities at public universities, and Base Operating and Equalization grants at community colleges. Income funds will be used for academic program improvements, and university programs that enhance education and strengthen campus life.
- **\$6.3 million for Illinois colleges and universities to improve productivity, cost-effectiveness, and accountability**, including \$29.5 million in general funds support for retirement contributions for the State Universities Retirement System and a \$28.2 million

decrease in Student Loan Fund spending authority. Income funds will support compensated absence payout reserves and university technology infrastructure projects.

The fiscal year 2003 recommendations for capital improvements total \$443.7 million. This recommendation supports 42 Regular Capital projects, and capital renewal projects for each public university and community college. The recommendations are summarized on Table I-5. The recommendations place high priority on projects designed to protect the state's investment in higher education facilities. Projects recommended for funding in fiscal year 2003 are listed in priority order on Table I-6.

Chapter II discusses the recommendations in the context of the goals and priorities of *The Illinois Commitment*. Chapters III through VIII include detailed information on the operations and grants budget recommendations by institution and agency, and Chapters IX through XI provide descriptions of each of the projects in the capital budget recommendations.

The staff recommends adoption of the following resolution.

The Board of Higher Education hereby approves the fiscal year 2003 budget recommendations for higher education operations and grants and capital improvements in the amounts and for the purposes outlined in this document.

* This list does not include funds for the Governor's Venture *TECH* initiative or the Governor's Enhanced Construction Program for community colleges, both of which the Board supports.

II. IMPLEMENTING THE ILLINOIS COMMITMENT

The Illinois Commitment: Partnerships, Opportunities, and Excellence sets forth the agenda and goals for Illinois higher education for the first decade of the 21st century. The document, informed by surveys of employers, opinion leaders, citizens, and students, articulates what constituent groups want and expect of Illinois colleges and universities. Since its endorsement nearly three years ago, *The Illinois Commitment* has served as a framework for improving quality and public accountability and has guided Illinois higher education institutions and agencies in focusing resources on the highest priorities. The Governor and General Assembly have responded to these priorities through significant investments in higher education in recent years.

The third annual *Statewide Results Report* (December 2001) documents the approaches Illinois higher education institutions and agencies have taken to make progress toward the six statewide goals of *The Illinois Commitment*. The report also acknowledges that Illinois higher education will face a series of challenges in the future as it works to retain its number one standing on the National Report Card. For example, institutions will need to respond to increasing demands from students, workers, and employers during this time of economic uncertainty, and they will need to work with K-12 schools to ensure that all teachers – those graduating from teacher-training programs and those now in classrooms – are equipped to teach to the Illinois Learning Standards that are tested on the Prairie State Achievement Examination. Additional efforts will be needed to ensure that: a college education remains affordable; college completion rates increase; and quality, productivity, and accountability are enhanced. Accordingly, the fiscal year 2003 budget recommendations focus resources toward continued implementation of the statewide goals of *The Illinois Commitment*:

- *Higher education will help Illinois business and industry sustain strong economic growth.*
- *Higher education will join elementary and secondary schools to improve teaching and learning at all levels.*
- *No Illinois citizen will be denied an opportunity for a college education because of financial need.*
- *Illinois will increase the number and diversity of citizens completing training and education programs.*
- *All Illinois colleges and universities will hold students to even higher expectations for learning and will be accountable for the quality of academic programs and the assessment of learning.*
- *Illinois colleges and universities will continually improve productivity, cost-effectiveness, and accountability.*

Budget Restrospective

Operations and Grants. Education was clearly the state's top priority in fiscal year 2002, receiving \$460.0 million, or 51 percent, of the then projected \$900 million growth in state general funds revenue. This increase included \$157.0 million for higher education and \$303.0 million for elementary and secondary education. As a reflection of the state's priority,

education received a 5.5 percent increase in general funds appropriations, while other state agencies and departments received an average increase of 1.5 percent. Fiscal year 2002 state general funds appropriations for higher education increased to 11.4 percent of total state general funds appropriations in fiscal year 2002, up from 11.2 percent in fiscal year 2000.

Table A shows state general funds appropriations for fiscal years 1993 through 2002. The \$157.0 million overall increase in general funds appropriations for higher education operations and grants is the largest one-year increase granted during the past decade. During this time period, the change in general funds appropriations ranged from a \$49.3 million, or 3.0 percent, decrease in fiscal year 1993 to a \$157.0 million, or 6.3 percent, increase in fiscal year 2002. The fiscal year 2002 increase in general funds appropriations exceeds the ten-year average increase in terms of dollar and percentage increases.

Table A

**General Funds Appropriations for Higher Education Operations and Grants
Fiscal Year 1993 Through Fiscal Year 2002**

(dollars in thousands)

<u>Fiscal Year</u>	<u>\$ Change from Previous Year</u>	<u>% Change from Previous Year</u>
1993	(\$ 49,311.2)	(3.0) %
1994	53,195.0	3.3
1995	103,340.8	6.3
1996	93,585.9	5.4
1997	113,242.2	6.1
1998	117,998.6	6.0
1999	148,384.6	7.2
2000	127,134.3	5.7
2001	132,565.0	5.6
2002	157,000.0	6.3
Average Annual Increase	\$ 99,713.5	4.9 %

Strong state support for higher education in recent years has been augmented through internal reallocation by institutions and agencies. For example, public universities have allocated nearly \$50.0 million to match state resources for the Retaining Critical Faculty and Staff initiative in fiscal years 2000, 2001, and 2002. Additionally, colleges and universities have reallocated funds to match state resources for the deferred maintenance initiative, to offset general cost and utilities increases, to make sick leave and vacation payouts, and to enhance other support services and academic programs.

Table B compares the Board of Higher Education's budget recommendations for operations and grants to final appropriations for fiscal years 1995 through 2002. During the

Table B
General Funds Recommendations and Appropriations for Operations
Fiscal Year 1995 Through Fiscal Year 2002

(in thousands of dollars)

Fiscal Year	BHE Recommendations	Appropriation	Difference Between BHE Recs. and Appropriation	
			\$ Change	% Change
1995	\$ 1,870,073.4	\$ 1,749,759.7	\$ (120,313.7)	(6.4) %
1996	1,844,699.7	1,843,345.6	(1,354.1)	(0.1)

period examined in this table, the average variance between the recommendations is \$19.4 million, or one percent.

Capital Improvements. During the past few years, Illinois higher education has enjoyed increased support for capital improvements as well. Table C summarizes state appropriations for capital improvements for fiscal years 1993 through 2002.

State appropriations for higher education capital improvements in fiscal year 2002 totaled \$412.4 million and represented the largest capital program approved by the General Assembly and Governor for higher education in at least two decades. These appropriations include funds made available through Governor Ryan's *VentureTECH* and Illinois FIRST programs, and may be augmented with additional allocations made available for college and university projects through the Illinois FIRST program funds distributed this year through the Department of Commerce and Community Affairs and other state agencies.

Table C

**Appropriations for Higher Education Capital Improvements
Fiscal Year 1993 Through Fiscal Year 2002**

(dollars in thousands)

2001	218,074.7
2002	412,372.9

Fiscal Year 2003 Budget Development Context

Setting a Context for Fiscal Year 2003 Budget Development (April 2001) set the framework for the fiscal year 2003 budget development process. This report articulated the statewide goals and activities that would receive priority in the fiscal year 2003 budget recommendations to assist higher education institutions and agencies in the development of their budget requests. The report emphasized that the budget recommendations would focus new resources on the programs and activities necessary to implement the goals of *The Illinois Commitment*. While the report cited economic data as evidence of a slowing economy that could signal a future recession, no one could have predicted the tragic events of September 11 and their subsequent effect on already weakened national and state economies.

Development of the fiscal year 2003 budget recommendations occurred during a time of considerable ambiguity regarding the current year's budget. Governor Ryan issued an administrative order on September 25, 2001 restricting certain state agency expenditures and several days later asked higher education to implement fiscal austerity measures for the duration of fiscal year 2002. In October, as additional economic data and state revenue information became available, the Governor announced that a two percent budget reserve requirement would be placed on state agencies to combat an estimated \$450.0 million shortfall in state revenues. And, on November 13, 2001, the Governor asked higher education to reserve \$25.0 million, or approximately 1 percent, of fiscal year 2002 state general funds appropriations for operations and grants (excluding funds for retirement and group health insurance). There are ongoing conversations between the Governor and legislative leaders regarding what actions are necessary to address the projected fiscal year 2002 state revenue shortfall and how to address current funding shortfalls for the state employee group health insurance program and retired teachers health insurance program. The outcome of these conversations will affect the amount of new revenue available for allocation in fiscal year 2003.

The economic outlook for fiscal year 2003 continues to be unclear. Forecasts provided by the Illinois Economic and Fiscal Commission call for a recovery to occur late in calendar year 2002, and estimate that new revenues in fiscal year 2003 may be in the \$400 million to \$500 million range. According to an economic index developed at the University of Illinois, economic growth in Illinois fell into negative territory for the sixth straight month in October and one more quarter of negative growth can be expected before a recovery occurs in 2002. Recent reports note that while the economy is officially in recession and consumer confidence remains low, inflation also remains low, and retail sales have been slightly stronger than expected. Since consumer spending accounts for two-thirds of the nation's economic activity, strong sales throughout the holiday season could be a sign that recovery is not far off. At this time, however, with so much uncertainty regarding domestic and international economic conditions, estimating the level of state revenue that will be available in fiscal year 2003 is difficult.

The fiscal year 2003 budget recommendations for higher education operations and grants direct funding increases to the highest statewide priorities in the context of the current economic environment. The recommendations call for an investment of \$2,789.2 million in state general funds for higher education operations and grants in fiscal year 2003, an increase of \$100.0 million, or 3.7 percent. Requests for additional state general funds from higher education institutions and agencies totaled \$228.0 million - \$128.0 million more than provided for in these recommendations. The recommendations require continued reallocation by institutions and agencies, and recognize that funding for many important new and enhanced initiatives will be delayed to future year budgets.

From the over \$1.0 billion requested by community colleges, public universities, and the Illinois Mathematics and Science Academy for capital improvements in fiscal year 2003, the recommendations include \$443.7 million for 43 capital improvement projects. The recommendations include funds to complete projects previously supported by the Governor and General Assembly, address infrastructure concerns, and provide funding for new facilities to address programmatic concerns and/or enrollment demand.

The following sections provide additional detail regarding the support provided by the fiscal year 2003 budget recommendations within the framework of six statewide goals of *The Illinois Commitment*.

Helping Business and Industry Sustain Strong Economic Growth

Higher education plays a critical role in business, industry, and the statewide economy. One of the fundamental contributions of higher education to business and industry is the supply of college-educated individuals who annually complete academic and occupational programs and enter the workforce. Just as business and industry recognize and respond to changing opportunities, higher education must continuously adjust program content and capacity to supply an ever-changing workforce.

A study commissioned by the Board of Higher Education and conducted at the University of Illinois, *Illinois Higher Education: Building the Economy, Shaping Society*, notes that Illinois colleges and universities directly aid the state economy by spending \$10 billion on an annual basis and providing 116,000 full-time-equivalent jobs. These expenditures, in turn, generate additional economic activity equal to \$28 billion annually. Many of the "economic benefits generated by colleges and universities come from out-of-state sources, which would be foregone in the absence of the universities." Finally, higher education also makes contributions to economic growth by

sponsoring and conducting research, which often leads to the discovery of new knowledge and the creation of innovative products and services. Finally, institutions provide numerous public service activities that support business and industry, as well as the communities they serve.

The fiscal year 2003 budget recommendations include \$1,742,000 in new funding to support business and economic development in Illinois, including \$375,100 in state general funds and \$1,366,900 in Universities Income Funds and other state funds. The specific programs and activities supported in the recommendations are listed in Table D.

Table D

**Recommended Additional Funding to Help Business and Industry
Sustain Strong Economic Growth in Fiscal Year 2003**

<u>Institution(s)/Agencies</u>	<u>Purpose/Program</u>	<u>General Funds</u>	<u>University Income and Other Funds</u>
Community Colleges	Workforce Development Grants	\$579,500	-
Institutional Grants	HECA Workforce and Economic Development Grants	150,000	-
Institutional Grants	Health Services Act Grants	(354,400)*	-
Chicago State University	MS in Computer Science	-	\$223,200
Southern Illinois University Carbondale	Digital Communication Specialization	-	328,700
	Center of Excellence/ Soybean Research	-	50,000
Institutional Grants	Veterinary Medicine Research	-	500,000
Northeastern Illinois University	Masters in Health and Wellness	-	135,000
	University Computing Internships	-	130,000
Total		\$375,100	\$1,366,900

* Reflects anticipated reduction in health program enrollments.

The capital budget recommendations include funds for several projects important to college and university efforts to help business and industry sustain a strong economy. These include equipment funds for a new College of Business building at Northern Illinois University, a Workforce Development Center for Heartland Community College, a Child Care and Workforce Development Center at Kaskaskia College, and renovation of the Engineering and Technology Center at William Rainey Harper College.

Join Elementary and Secondary Education to Improve Education at All Levels

The fiscal year 2003 budget recommendations support a number of initiatives that will further higher education's efforts in joining elementary and secondary education to improve teaching and learning at all levels. Such an approach is recommended in *Gateway to Success: Rethinking Access and Diversity for a New Century*, which calls for all high school students to take a college preparatory curriculum. Recent results from the Prairie State Achievement Examination indicate that just over half of Illinois high school juniors meet or exceed state learning standards. Just over half of college-bound high school students complete the college preparatory curriculum. The fiscal year 2003 budget recommendations include funds for cooperative efforts designed to ensure teachers are trained to teach to the Illinois Learning Standards, enhance the Illinois Virtual High School, and expand community college programs serving high school students who are prepared to enroll in college level coursework while still in high school.

Improving Illinois' Educator Workforce, a report to the Illinois General Assembly prepared by the Joint Education Committee, notes problems regarding the supply and quality of educators in the state's schools and recommends a number of actions regarding teacher recruitment, preparation, retention, and continuing professional development. The fiscal year 2003 budget recommendations target resources for a number of programs designed to improve teacher preparation, assist institutions in their efforts to meet National Council for Accreditation of Teacher Education (NCATE) standards, and increase the number of persons trained as teachers.

The fiscal year 2003 budget recommendations include \$4,789,200 million in new resources for programs and initiatives designed to improve teaching and learning at all levels, including \$900,000 in state general funds and \$3,889,200 in Universities Income Funds. The specific programs and activities supported in the recommendations are listed in Table E.

Table E

Recommended Additional Funding to Improve Teaching and Learning at All Levels in Fiscal Year 2003

<u>Institution(s)/Agencies</u>	<u>Purpose/Program</u>	<u>General Funds</u>	<u>University Income and Other Funds</u>
Institutional Grants	HECA Teaching, Learning, and Quality	\$1,050,000	-
Institutional Grants	Financial Assistance Act Grants	600,000	-
Illinois Century Network	Content Development	(1,000,000)*	-
Illinois Community Colleges	P-16 Accelerated College Enrollment Grants	250,000	-
Eastern Illinois University	Master Teacher Program	-	\$ 75,000

	Certification Completion Program	-	65,000
	Cross Disciplinary Teacher Program	-	100,000
	Summer Bridge Program	-	35,000
Governors State University	Technology Science Teacher Education Recertification	-	55,300
	BS in Math/Secondary Teacher Certification	-	57,100
Northeastern Illinois University	In-Service Apprenticeship Program	-	150,000
	Alternative Teacher Certification	-	200,000
Illinois State University	Distinctiveness and Excellence	-	1,750,800
Southern Illinois University Edwardsville	Teacher Shortage	-	100,000
Southern Illinois University Carbondale	Center for Graduate Student Excellence in Teaching	-	200,000
University of Illinois at Chicago	P-16 Education	-	851,000
University of Illinois at Urbana Champaign	P-16 Education	-	250,000
Total		\$900,000	\$3,889,200

* One-time appropriation.

The capital budget recommendations include funds for planning a new Education Facility at Northeastern Illinois University and for constructing a Community Instructional Center at Illinois Valley Community College. A laboratory school for the Early Childhood Education Program and a child care center will be housed in the Center.

Assuring Opportunity Through Affordability

Illinois received an "A" grade for affordability in *Measuring Up 2000*; one of only five states to receive this high grade. It was the Monetary Award Program, the third largest of its kind in the nation, more than any other single indicator, that earned Illinois an "A" in affordability. State student aid targeted to low income families as a percent of federal Pell Grant aid to low income families is 124 percent in Illinois, compared to 106 percent among top performing states. Yet, there remains a gap between the rich and the poor. In Illinois, 54 percent of the persons between 18 and 24 years of age from high income families enroll in college, compared to 20 percent of those from low income families.

Assuring that all citizens have the opportunity to access higher education requires that the net price to students (i.e., total costs less available student financial aid) does not increase faster than a family's ability to pay. Controlling the net price to students requires setting educational charges at reasonable rates and providing financial aid for those students least able to pay for college. According to the College Board, tuition and fees at public four-year institutions nationwide increased 4.4 percent in fiscal year 2001 over the previous year. College costs continue to rise faster than inflation, which as measured by the Consumer Price Index increased 3.4 percent in fiscal year 2001. In Illinois, the average increase in tuition and fees was 7.1 percent for all sectors in fiscal year 2002.

Both the Board of Higher Education's Committee on Access and Diversity and the Commission on Persistence and Degree Completion confirmed the importance of financial aid in their reports released in the past year. Recommendations from these two groups include the importance of providing aid to students enrolled on a part-time basis, and supporting programs to encourage completion of a baccalaureate degree in four years.

Illinois has a long-standing commitment to provide access and choice by supporting a strong student financial aid program. These recommendations build upon the Board's commitment and its policies on affordability by providing \$20,100,000 in new support for the Monetary Award Program, as well as funding for outreach initiatives and other grant programs administered by the Illinois Student Assistance Commission. Recommendations for the Monetary Award Program, the state's largest need-based student aid program, include components to maintain affordability by covering the cost of 5.0 percent tuition and fee increases, increasing the maximum award by \$198 to \$5,166, and accommodating recent application volume increases in the program.

The fiscal year 2003 budget recommendations include new funding of \$25,836,000 for programs designed to maintain the affordability of a college education. This total includes \$19,230,000 in general funds and \$6,606,000 in income funds. The specific recommendations are shown in Table F.

Table F

**Recommended Additional Funding to Help Make Higher Education
More Affordable in Fiscal Year 2003**

<u>Institution(s)/Agencies</u>	<u>Purpose/Program</u>	<u>General Funds</u>	<u>University Income and Other Funds</u>
Illinois Student Assistance Commission	Monetary Award Program	\$20,100,000	-
	Dependents Grants	25,000	-
	College Savings Bond Grants	30,000	-
	Illinois Veterans Grants	(500,000)*	-
	Merit Recognition Scholarships	(500,000)*	-
Institutional Grants	Graduation Incentive Grant Program	75,000	-
University of Illinois at Chicago	Student Aid	-	\$2,606,000

University of Illinois at Urbana-Champaign	Student Aid	-	4,000,000
Total		\$19,230,000	\$6,606,000

* Reflects projected reductions in number of eligible recipients.

Increasing Access and Diversity

The Illinois Community College Board assumed responsibility for state level governance and administration of the state's adult education program from the Illinois State Board of Education in fiscal year 2002. Plans are underway for the transition of two other postsecondary educational activities (Vocational Education Grants and Program Improvement Grants) from the State Board of Education to the Illinois Community College Board in fiscal year 2003.

This past year, the Board's Committee on Access and Diversity completed a two-year study whose recommendations, approved by the Board, set an orientation and direction for future Board action. The study's recommendations emphasized the need to improve high school academic preparation and, most notably, endorsed a change in the state curricular requirements that would mandate all students to take a college prep curriculum. The Committee also stressed the need to provide students with the "right kind of access" to ensure future academic success. The Board's recommendations called for "last year/first year programs" to make the senior year of high school more productive in preparing students for college and the freshman year of college more successful in reducing attrition rates. The recommendations include support for developing a financial aid program and establishing partnerships with private organizations to enhance student diversity while, more generally, the Board supported the continued use of race/ethnic criteria in admissions and financial aid decisions, as permitted under the U.S. Supreme Court *Bakke* decision.

The fiscal year 2003 budget recommendations include \$7,316,100 in new funds allocated for programs and activities to improve access and diversity in higher education, including \$1,490,000 in state general funds and \$5,826,100 in Universities Income Funds. The specific recommendations are listed in Table G.

Table G

Recommended Additional Funding to Increase Access and Diversity in Fiscal Year 2003

<u>Institution(s)/Agencies</u>	<u>Purpose/Program</u>	<u>General Funds</u>	<u>University Income and Other Funds</u>
Illinois Community Colleges	Adult Education	\$1,015,000	\$4,500,000
	Postsecondary Career and Technology Education Grants	245,000	-
	AFDC Opportunities Fund	-	(100,000)
Institutional Grants	HECA Access and Diversity Grants	100,000	-

	Consortium Education Opportunity Grants	100,000	-
	University Center of Lake County	25,000	-
	Quad Cities Graduate Study Center	5,000	-
Chicago State University	Hispanic Future Professionals Academy	-	100,000
Eastern Illinois University	Web-based Programs for Persons with Disabilities	-	10,000
	Improving Student Retention	-	68,000
	Quality Students	-	65,000
Northeastern Illinois University	Handicap Educational Liaison Program	-	150,000
Western Illinois University	Quad Cities Campus	-	1,033,100
Total		\$1,490,000	\$5,826,100

Enhance Student Learning and Assessment And the Quality of Academic Programs

To be accountable for the quality of academic programs, institutional programs must be student-learning centered and results-oriented. Institutions must continuously reassess the quality of their academic programs and target new and reallocated resources to the most important program priorities. In addition, because the quality of instruction is directly related to the quality of the faculty and staff, it is a high priority at both the statewide and campus levels that resources be available to recruit and retain the highest quality faculty and staff.

Competitive compensation has been, and continues to be, one of the highest priorities in Illinois higher education. Colleges and universities often cite the ability to recruit and retain the highest quality faculty and staff as a top institutional priority and an increasing challenge in the face of other needs such as technology, deferred maintenance, and student affordability. In recent years, Illinois colleges and universities have reallocated millions of dollars into salary competitiveness. Despite these efforts, recruiting and retaining faculty and staff, particularly in areas such as information technology and other high demand fields, continues to be a challenge.

In fiscal years 2000, 2001, and 2002 Governor Ryan and the General Assembly provided funds for an initiative designed to enhance efforts to recruit and retain critical faculty and staff at Illinois public institutions and agencies by bringing faculty salaries to the median of national peers. The initiative provides state funds for an average three percent salary increase and additional funding to recruit and retain critical faculty and staff. State funding in fiscal years 2000 and 2001 included funds equal to one percent of the personal services base; state funding in fiscal year 2002 equaled two percent of the personal services base. Institutions are expected to match the additional increment with an equal amount of institutional funds. *Full-Time Faculty and Civil Service Salaries at Illinois Colleges and Universities* (August 2001) presented data on fiscal year 2001 salaries, reflecting the results from the second year of the initiative and charting the progress made in moving Illinois faculty salaries closer to the median salary of their national

peers. The report showed that some progress has been made in improving salaries in comparison to peers, yet the statewide average faculty salary remains four percent below that of peer institutions.

The fiscal year 2003 budget recommendations include funding for the continuation of the Recruiting and Retaining Critical Faculty and Staff initiative, a five-year plan designed to enhance the competitiveness of faculty and staff salaries. Funds are included for an average three percent salary increase for faculty and staff of public universities and higher education agencies. State funding of \$7,878,200 (equal to a one-half percent salary increase) is recommended for recruiting and retaining critical faculty and staff and other academic program enhancements. Institutions and agencies will be expected to allocate agency or institutional funds equal to the state funds provided for the Recruiting and Retaining Critical Faculty and Staff initiative. Under this "3+ ½ + ½" plan, institutions whose current faculty salaries are at or above peer medians will be expected to maintain their level of faculty salary competitiveness. Institutions whose current salaries are below peer medians will be expected to improve the competitiveness of their faculty salaries. Funds may be used to recruit and retain employees in high demand areas; provide performance-based salary increases; provide incentives for early retirement programs; offset state-mandated early retirement costs; purchase equipment and remodel laboratories to recruit new faculty; recruit minority faculty; and to support faculty and staff recruitment and retention programs.

The recommendations also propose that University Income Funds be allocated for a variety of public university programs and activities designed to improve quality. These allocations include funding for technology enhancements, library resources, student assessment, and enhancements to base funding for Liberal Arts and other academic programs. A summary of these programs is provided in Table H.

Table H
**Recommended Additional Funding for Higher Expectations
and Quality in Fiscal Year 2003**

<u>Institution(s)/Agencies</u>	<u>Purpose/Program</u>	<u>General Funds</u>	<u>University Income and Other Funds</u>
Public Universities and Higher Education Agencies	Salary Increases and Medicare	\$30,474,000	\$17,213,500
	Recruiting and Retaining Critical Faculty and Staff	7,878,200	-
Illinois Community Colleges	Base Operating Grants	3,525,000	-
	Equalization Grants	4,000,000	-
	Advanced Technology Grants	438,200	-
Public Universities	Operations and Maintenance of New Space	2,100,500	-
University of Illinois at Urbana-Champaign	Academic Programs: Technology	-	2,000,000
	Academic Programs: General	-	9,179,400
	Cost Recovery Programs	-	2,393,600

University of Illinois at Chicago	Academic Programs: Technology	-	519,000
	Academic Programs: General	-	3,245,300
	Cost Recovery Programs	-	392,200
University of Illinois at Springfield	Liberal Arts Instruction	-	971,400

	Technology Enhanced Education	-	512,000
Chicago State University	Center for Student Assessment	-	204,900
	Instructional Laboratory Fees	-	17,000
Southern Illinois University Carbondale	Direct Cost Recovery	-	115,000
	Applied Sciences and Arts	-	200,000
Northeastern Illinois University	Instructional Staffing	-	310,000
Southern Illinois University Edwardsville	Enhancing Student Learning	-	1,409,100
	Enhancing Dental Medicine	-	115,300
	Strengthen Campus Life	-	303,700
Total		\$48,415,900	\$39,951,400

The capital budget recommendations include projects to ensure that adequate facilities are available at community colleges and public universities for providing quality instruction that is relevant to the needs of the workplace. A Center for Technical Education at Lake Land College will consolidate engineering, manufacturing, and electronics programs in one location to provide better interaction and collaboration among students and faculty and sharing of equipment.

Increasing Productivity, Cost Effectiveness, and Accountability

The Board of Higher Education will consider *Establishing Performance Indicators to Assess Progress Toward Meeting the Goals of The Illinois Commitment* at its meeting on December 11, 2001. This document proposes a methodology and process for developing a system of performance indicators that will help assess how well Illinois is meeting the six statewide goals.

The fiscal year 2003 budget recommendations for the State Universities Retirement System include a general funds increase of \$29,514,000, or 12.6 percent, over fiscal year 2002 appropriations. The recommendations include the amount certified by the State Universities Retirement System to satisfy the minimum annual funding requirements of Public Act 88-0593. A decline in the market value of the System's assets reduced the funding ratio for total assets to total liabilities from 88.2 percent on June 30, 2000, to 72.1 percent on June 30, 2001, making an increase of this magnitude necessary to comply with statutory requirements for the System. Also included is the amount certified for the health insurance program for retired community college faculty and

staff. Recommendations related to productivity, cost-effectiveness and accountability are listed on Table I.

Table I
Recommended Additional Funding to Improve
Accountability and Productivity in Fiscal Year 2003

<u>Institution(s)/Agencies</u>	<u>Purpose/Program</u>	<u>General Funds</u>	<u>University Income and Other Funds</u>
State Universities Retirement System	Employer Retirement Contributions	\$29,514,000	(\$300,000)
Illinois Student Assistance Commission	Operations	75,000	
	Student Loan Fund	-	(28,169,200)
	MAP Reserve Fund	-	177,000
Northeastern Illinois University	Vacation/Sick Leave Payout Reserve	-	659,100
	Deferred Maintenance	-	250,000
Eastern Illinois University	Vacation/Sick Leave Payout Reserve	-	325,000
University of Illinois System	UI Integrate	-	3,698,200
	Fire Prevention Fund	-	60,200
Total		\$29,589,000	(\$23,299,700)

The fiscal year 2003 capital budget recommendations include \$30.0 million for Capital Renewal, with \$20.0 million funded with Capital Development Funds and \$10.0 million funded with Build Illinois Funds. Fiscal year 2003 is the fourth year of the five-year Illinois FIRST initiative to provide a total of \$50.0 million Build Illinois Funds for Capital Renewal improvements for universities and colleges. The Capital Renewal program provides resources for each university and community college to undertake minor remodeling projects. These smaller projects, along with several major remodeling projects will ensure the institutions' facilities are protected and preserved. Major remodeling projects recommended for funding include the renovation of Morris Library at Southern Illinois University at Carbondale, improvements to Stevenson and Turner Halls at Illinois State University, remodeling of Lincoln Hall at the University of Illinois at Urbana-Champaign, and remodeling of the Technology Building at Triton College.

OPERATIONS AND GRANTS

III. PUBLIC UNIVERSITIES

The fiscal year 2003 budget recommendations for public universities include new resources to support the statewide goals included in *The Illinois Commitment* while recognizing that state resources will not be sufficient to address all university needs. The recommendations assume that state resources will be leveraged with institutional reinvestments in the important areas of faculty and staff compensation. High priority campus initiatives not supported in these recommendations also may be supported through campus reinvestments. This combination of incremental state funding and institutional reinvestments is necessary to address campus needs.

The fiscal year 2003 budget recommendations for public universities total \$2,186.8 million, with \$1,542.7 million in state general funds, an increase of \$39.8 million or 2.6 percent. This funding supports an average three percent salary increase, the Recruiting and Retaining Critical Faculty and Staff Initiative, and operations and maintenance for new facilities. The recommendations for public universities are summarized on Tables III-1 through III-4. Tables listing the specific program recommendations for each institution follow Table III-4.

Compensation Increases. The budget recommendations include funding for a three percent average salary increase and for increases in Social Security/Medicare. Specifically, a total of \$29.5 million is provided for general salary increases, and a total of \$453,300 is provided for employer contributions to Social Security/Medicare. Actual salary increase decisions will vary by campus and individual based on available campus resources and other decision factors.

Recruiting and Retaining Critical Faculty and Staff. The budget recommendations include \$7.8 million for the Recruiting and Retaining Critical Faculty and Staff initiative at public universities. This marks the fourth year of a five-year initiative to enhance the competitiveness of faculty and staff salaries. This funding represents a one-half percent salary increase, calculated on 95 percent of the personal services base, and is to be matched with institutional funds. The resulting "3+ ½ + ½" plan, will support various campus-based initiatives to recruit and retain staff. Funds will be used to recruit and retain employees in high demand areas; provide performance-based salary increases; provide incentives for early retirement programs; offset state-mandated early retirement costs; purchase equipment and remodel laboratories to recruit new faculty; recruit minority faculty; and to support faculty and staff recruitment and retention programs.

Operations and Maintenance for New Facilities. A total of \$2.1 million is included in the budget recommendations to support the operating and maintenance costs of new buildings at public universities in fiscal year 2003. Funds are provided at a rate of \$5.40 per gross square foot for all operation and maintenance requirements other than utilities. Utility requirements are calculated based on the campus direct utility cost per gross square foot. Table J provides a summary of recommended funds for the operations and maintenance of new buildings.

Table J
Fiscal Year 2003 Recommended Funds
for the Operation and Maintenance of New Buildings

<u>Institution</u>	<u>Facility/Area</u>	<u>Recommended Amount</u>
Eastern Illinois University	Fine Arts Center	\$ 200,000
Governors State University	Family Development Center	149,400
Illinois State University	College of Business	190,000
Northern Illinois University	Barsema Hall	432,000
	Family Violence Center	96,000
Southern Illinois University Carbondale	Service Center (Springfield)	209,600
	Touch of Nature Infirmary	2,000
	Safety Center Building	13,000
	Altgeld Hall	70,700
Southern Illinois University Edwardsville	Advanced Technical Worker Training Center	48,100
	Ethanol Plant	173,000
	University Park Building	111,300
University of Illinois at Chicago	Student Services Building	179,900
	Police Station	22,800
University of Illinois at Urbana-Champaign	Expanded Child Development Lab	165,300
	Subsonic Aerodynamics Laboratory	<u>37,400</u>
Total		\$2,100,500

University Income Funds. These recommendations recognize the authority of public universities to collect, hold, and spend income fund revenues locally. The recommendations also recognize that tuition revenues are a significant source of support for institutional resource requirements and campus priorities. Universities are expected to contribute tuition revenues to support the general salary increase decision rules in these recommendations, which is calculated as three percent of the fiscal year 2002 institutional income fund budget. In fiscal year 2003, the university income fund contribution for salary decision rules in these recommendations totals \$17.2 million. At those campuses where income funds over and above the three percent cost and salary contribution are available due to enrollment increases and/or tuition increases, the budget recommendations include the campus's allocation of those revenues to specific program priorities consistent with the universities' program priority requests.

In fiscal year 2003, universities estimate the availability of \$642.9 million in university income funds, an increase of \$57.7 million, or 9.9 percent, over fiscal year 2002 levels. Chicago State University, Northern Illinois University, and the University of Illinois had not made final tuition decisions at the time these recommendations were developed. The recommendation for each campus is based on campus estimates of available tuition and other income fund revenue considering fiscal year 2003 tuition and fee rates, the amount of tuition collected, and the number of students enrolled.

IV. COMMUNITY COLLEGES

The guiding principles used in the development of the fiscal year 2003 budget recommendations for the community college system are contained in both the Illinois Community College System's *Promise for Illinois* and the Board of Higher Education's *Illinois Commitment: Partnerships, Opportunities, and Excellence*. The seven pledges of the *Promise for Illinois* are:

- Address workforce development needs with flexible, responsive, and progressive programs.
- Offer rigorous courses and programs designed for college and university transfer.
- Expand adult education and literacy programs necessary for individuals and families to have high quality work and life in Illinois.
- Equip Illinois residents with the technology skills they need to be successful in the 21st century.
- Emphasize high quality in all programs, services, and operations.
- Deliver affordable learning opportunities to the doorstep of Illinois residents.
- Model and promote leadership and ethical decision-making.

In September 2001, the Illinois Community College Board identified five areas as the top priorities for the system in fiscal year 2003. Those five areas are Base Operating Grants, Equalization Grants, Workforce Development Grants, P-16 Initiative Grants, and Advanced Technology Grants.

Community College Operations and Grants

Table IV-1 summarizes the fiscal year 2003 recommendations for community college system grants and initiatives and the operation of the Illinois Community College Board office.

Table IV-2 provides the calculations used to determine the fiscal year 2003 resource requirements. Fiscal year 2003 resource requirements included in these recommendations support apportionment enrollments of 196,929 full-time-equivalent students; a decrease of 41 students from fiscal year 2002. The community college funding plan requires the inclusion of non-state revenues as sources of funding for community college resource requirements. Table IV-3 provides a summary of estimated fiscal year 2003 revenues, and Table IV-4 provides supporting calculations for local tax and tuition and fee revenue estimates. Table IV-5 provides the calculation of the credit hour allocation of Base Operating Grants by instructional funding category. Table IV-6 summarizes recommended grant allocations by district. By state statute, the Illinois Community College Board makes the actual allocation of grants to districts. The district allocation presented in Table IV-6 was prepared by the Illinois Community College Board at the funding levels recommended for community college grant programs by the Board of Higher Education. These amounts will change as final audited data are submitted to the Illinois Community College Board. Funding recommendations for community college operations and grants to address the goals and priorities of *The Illinois Commitment* are summarized below:

Base Operating Grants. Total funding of \$197.3 million is recommended for fiscal year 2003 Base Operating Grants, an increase of \$3.5 million, or 1.8 percent over fiscal year 2002 appropriations. These grants comprise approximately 58 percent of the state funded grant programs provided to the community college system. Base Operating Grants are unrestricted funds and are used for base support and for specific priorities as determined by each local district. These grants are calculated based upon two factors: the major portion of this

grant, \$194.85 million, is allocated based upon credit hour enrollment within six instructional categories, while a smaller portion, \$2.45 million, is allocated based upon the total gross square footage of the district's facilities. Base Operating Grants are calculated using a residual formula that takes into account cost and salary needs projected from historical cost data and revenue available to meet these needs through other sources such as local property taxes, student tuition and fees, other state grant funding, federal funds, and miscellaneous local revenues. Fiscal year 2003 resource requirements include a salary and Medicare increase of 3.0 percent; no other cost increases are included.

Small College Grants. Small College Grants are distributed to districts with enrollments of less than 2,500 full-time-equivalent students, excluding students in correctional institutions. This grant has remained at \$60,000 per qualifying district for several years. Fifteen districts qualify for this grant, for a total fiscal year 2003 recommendation of \$900,000, the same level as fiscal year 2002.

Equalization Grants. Funds totaling \$81.4 million are included in the fiscal year 2003 budget recommendations for Equalization Grants, an increase of \$4.0 million, or 5.2 percent over fiscal year 2002. Equalization Grants are provided to address the variation in local tax wealth among the community college districts by allocating supplemental funds per student to those districts that fall below a statewide average threshold of local tax revenue per full-time-equivalent student. Within the state of Illinois, local tax revenue per student ranges from \$639 at Southeastern Illinois Community College to \$5,946 at the College of Lake County, a difference of \$5,307 per full-time-equivalent student. Past levels of appropriations have not provided for funding at 100 percent of the statewide average threshold of local revenue per student. Attempts have been made over the past three fiscal years to address this base level of support per student by placing a high priority on Equalization Grants in budget recommendations in order to achieve full funding of the equalization threshold. Fiscal year 2002 appropriations provided funding at 98.5 percent of the threshold. This year's budget recommendations of \$81.4 million will provide funding for 99.5 percent of the calculated statewide average threshold.

Performance-Based Initiative Grants. The Illinois Community College system has developed a performance-based initiative that defines outcomes and measures and provides grants to colleges based on the following factors: student satisfaction, educational advancement, success in employment or continuing education, transfer, population served, remedial course completion rates, and progress towards attaining district-defined goals. A total of \$2.0 million is recommended for fiscal year 2003. This level of funding is the same as that provided in fiscal year 2002, and is what was requested by the Illinois Community College Board.

Special Population Grants. Funds totaling \$13.3 million are recommended for fiscal year 2003 Special Population Grants. No increase in funding is recommended over fiscal year 2002 appropriations. These funds support districts in their efforts to provide special or extra services to assist special populations students to initiate, continue, or resume their education and to provide the skills necessary to remedy or correct educational deficiencies. Special populations students include those students with a social, developmental, physical, or academic disability. Funds are distributed through a \$20,000 base grant per college with the remaining allocation based on adult basic, adult secondary, English as a Second Language, and remedial credit hours.

Workforce Development Grants. A total of \$19.9 million is recommended for fiscal year 2003 grants supporting workforce development, an increase of \$579,500, or 3.0 percent, over fiscal year 2002 appropriations. Workforce Development grants support activities in four

separate areas, including Current Workforce Training, Business and Industry Services, Education to Careers, and Welfare-to-Work. Local districts can transfer up to one-third of the total allocation from any of these components into another area to specifically address the workforce needs of the local district. Descriptions of the four components follow.

- Current Workforce Training Grants are designed to assist colleges to be more competitive in providing noncredit training for existing employees at local businesses and industries by allowing colleges to charge direct training costs to this grant, thus reducing the cost to the local business. A total of \$5.2 million is recommended for fiscal year 2003, an increase of \$221,500, or 4.4 percent over fiscal year 2002. Grants are distributed on the basis of the number of district residents in the labor force that currently are employed, with a minimum grant of \$50,000 to each district.
- Business and Industry Services Grants provide funding for a business and industry center and help support involvement with state and local economic development efforts. A total of \$6.6 million is recommended for fiscal year 2003, an increase of \$208,000, or 3.3 percent, over fiscal year 2002. A base grant of \$65,000 is distributed to each district, with the remaining funds allocated on the basis of occupational and vocational credit hours.
- A total of \$4.3 million is recommended for the Education to Careers Grant, an increase of \$125,000, or 3.0 percent. These funds are used for the development of a fully integrated education/employment system to ensure that students move easily from education to work and from work to continuing education. A base grant of \$87,500 is distributed to each district with the remaining funds allocated on the number of district residents in the labor force and the unemployment rate of the district.
- A Welfare to Work Grant of \$3.9 million, an increase of \$25,000, is recommended to supplement existing federal funds and to provide employment training and job placement services to welfare clients and the working poor at each community college. These funds are distributed through a base grant of \$60,000 per district and the remaining allocation based on the number of welfare caseloads in the district.

Advanced Technology Grants. Fiscal year 2003 budget recommendations include \$15.0 million for the Advanced Technology Grant area, an increase of \$438,200, or 3.0 percent, over fiscal year 2002, and are comprised of the following components: Illinois Community Colleges Online, Advanced Technology Equipment Grants, Advanced Technology Support Grants, and Staff Technical Skills Enhancement Grants. Local districts can transfer up to one-third of the total allocation from any of these components into another area to specifically address the needs of the local district. The four components are described below:

- A total of \$650,000 is recommended for Illinois Community College Online, an increase of \$100,000, or 18.2 percent, over fiscal year 2002 appropriations. These funds allow all community colleges to maintain the necessary student support services for the Illinois Community Colleges Online and the Illinois Virtual Campus activities. A flat grant of \$16,667 is distributed to each community college district to provide these support services.
- \$6.0 million is included in the fiscal year 2003 recommendations for Advanced Technology Equipment Grants to allow colleges to continually upgrade and purchase new specialized instructional equipment and to purchase new computer hardware and software for instructional and student use. This represents an increase of \$110,000, or 1.9 percent, over

fiscal year 2002. Funds are distributed based on the number of occupational and vocational credit hours generated by each district.

- Fiscal year 2003 funding recommendations for Advanced Technology Support Grants totals \$6.2 million, an increase of \$155,200, or 2.6 percent, over fiscal year 2002 appropriations. These funds are used to purchase equipment and computer laboratory upgrades as well as for technology infrastructure, transmission, and maintenance costs. Funding is provided through a base grant of \$75,000 for each district and the remaining funds are distributed based upon the number of square miles of the district, the number of market service delivery areas within the regional consortia, and the annual student headcount of the district.
- These recommendations include \$2.2 million for Staff Technical Skills Enhancement Grants, an increase of \$73,000, or 3.4 percent. Faculty and staff receive training in the utilization of computers, computer systems, computerized machinery, and instructional technologies with funds provided through this grant. Staff Technical Skills Enhancement funds are distributed based on the number of faculty and staff FTE employed by the district.

Deferred Maintenance Grants. A total of \$3.5 million is included in the fiscal year 2003 budget recommendations to address the backlog of deferred maintenance projects on community college campuses. These grants aid community colleges in addressing the backlog of accumulated maintenance projects that are not covered by capital renewal or protection, health, safety funding. No increase is recommended for fiscal year 2003 over fiscal year 2002 funding levels.

P-16 Initiative/Accelerated College Enrollment Grants. These grants are provided to allow community colleges to continue to expand their services to high school students desiring to take college-level classes while still in high school. This grant subsidizes the cost to the college for offering courses to high school students without charging tuition and fees. The total recommended for fiscal year 2003 is \$1.75 million, an increase of \$250,000, or 16.7 percent, over fiscal year 2002 appropriations. Funds for this initiative are distributed to districts based on the number of junior and senior high school students in the district, with a minimum grant of \$12,500 per district.

Retirees Health Insurance Grants. Funding of \$735,000 is recommended for the retirees health insurance program for fiscal year 2003, the same level appropriated in fiscal year 2002. Only employees of the City Colleges of Chicago participate in this program. All other community college districts are eligible to participate in the College Insurance Program administered by the Department of Central Management Services. The appropriation for this statewide program is made to the State Universities Retirement System.

Community College Foundation Matching Grants. Fiscal year 2003 budget recommendations include \$333,000, the same level as appropriated in fiscal year 2002, for Community College Foundation Matching Grants. Colleges may request these state matching grants of \$2 for every \$3 received in new local funds.

Leadership and Core Values Grants. A total of \$250,000 is included in fiscal year 2003 budget recommendations for activities relating to statewide leadership and core value initiatives. Activities include demonstration projects showing effective ways of teaching leadership and core values in a community college setting, workshops, seminars, and for the operation of the Center for Applied Ethics.

Special Initiative Grants. Funds totaling \$1.2 million are included in the fiscal year 2003 recommendations for Special Initiative Grants. These funds will be awarded on a Request for Proposal basis and will focus on higher education priorities as identified by the *Promise for Illinois* and *The Illinois Commitment*.

Lincoln's Challenge Grants. Funds of \$125,000 are included in the fiscal year 2003 budget recommendations to provide scholarships for at-risk youth who choose to attend a community college. This level of funding is the same as the fiscal year 2002 appropriation.

East St. Louis Higher Education Center. A total of \$2.2 million is recommended for programs offered at the East St. Louis Higher Education Center in fiscal year 2003. This level of funding is the same as the fiscal year 2002 appropriation.

Illinois Community College Board

A total of \$2.6 million in state general funds is recommended for the Illinois Community College Board office operations, an increase of \$56,400 or 2.2 percent. The recommendation includes funds for an average three percent salary increase, Medicare increases, and the Recruiting and Retaining Critical Faculty and Staff Initiative. The recommendation also includes \$25,000 for the Illinois Occupational Information Coordinating Council.

Federal funding of \$2.5 million is included in the Illinois Community College Board office operations budget for costs associated with the administrative and governance functions of the statewide adult education programs.

V. ADULT EDUCATION AND POSTSECONDARY CAREER AND TECHNICAL EDUCATION

Table V-1 summarizes fiscal year 2003 budget recommendations for Adult Education Grants and Postsecondary Career and Technical Education Grants. The components of each are described below:

Adult Education Grants. Public Act 91-830 transferred the state level governance and administration of adult education programs from the Illinois State Board of Education to the Illinois Community College Board on July 1, 2001. Fiscal year 2002 appropriations reflect the transfer of administration of adult education to the Illinois Community College Board, and include funds for grants to all adult education providers. Fiscal year 2002 funding for adult education totaled \$60.0 million, including \$21.0 million in federal funds and \$39.0 million in state general funds. The fiscal year 2002 appropriation reflected an increase of \$9.0 million, or 30.0 percent, over general funds provided in fiscal year 2001. This increase in funding has been used to address the following principles as outlined in the "Expanded Adult Education" Pledge of the *Promise for Illinois: Illinois Community College System Strategic Plan*:

- Assure adequate, stable, flexible resources which promote and enable program growth and innovation for all adult education students,
- Build a strong, multi-provider delivery system that is responsive to multiple learning needs of adults,
- Develop adult education programs that focus on outcomes and offer a variety of methods to meet diverse and changing learner needs,
- Ensure a professionally competent and committed adult education staff through high quality staff development,
- Support full and authentic relationships with business, industry, and community agencies, and
- Reduce barriers to access and increase accessibility to programs through technology and workplace/community locations.

Adult education programs provide instruction to people 16 years age and older who are no longer enrolled in school and who lack the basic skills necessary for employment or further education or training. These programs include adult basic education, adult secondary education, and English as a Second Language and are offered by community colleges, public schools, community-based organizations, regional offices of education, correctional institutions, and one public university. These programs are intended to provide higher levels of literacy in reading, writing, and mathematics to prepare students for employment and advancement in the workforce and to provide basic education and English as a Second Language to the state's growing international population.

The fiscal year 2003 general funds recommendation for adult education programs in Illinois totals \$40.0 million, an increase of \$1.0 million, or 2.6 percent over fiscal year 2002 appropriations. These funds are intended to address the continued expansion of adult education programs, the growing segment of the population requiring English as a Second Language courses, state funding for community-based organization providers, increases in the number of full-time teaching staff, updated data systems, and the incorporation of technology and on-line learning in instructional delivery systems. The \$40.0 million general funds recommendation is comprised of three components: State Basic Grants which are general funds used in support of all aspects of adult education programs, Public Aid Grants which are specifically targeted for

instruction and services to public aid recipients, and Performance Based Grants which are unrestricted funds allocated to adult education providers based upon a series of outcome measures. These measures include secondary completions (GED and high school), level gains (improved academic progress), test score gains, persistence, and public aid reductions. The federally funded component of the adult education program is estimated to increase from \$21.0 million in fiscal year 2002 to \$25.0 million in fiscal year 2003, bringing total funding for adult education programs to \$65.0 million.

Postsecondary Career and Technical Education Grants. Beginning in fiscal year 2003, the Illinois Community College Board will assume administrative responsibility for several aspects of postsecondary career and technical education programs formerly administered by the Illinois State Board of Education. These programs include State Program Improvement Grants which support improvements in programs related to instructional equipment, staff development, curriculum development, and academic/technical integration needs and State Vocational Education Grants which reimburse community colleges, based on technical/occupational credit hours generated, for costs associated with providing career and technical education programs. In fiscal year 2002, a total of \$9.5 million in state general funds was appropriated to the Illinois State Board of Education for the State Program Improvement Grants and State Vocational Education Grants. These recommendations include \$9.7 million, an increase of \$245,000, or 2.6 percent, for fiscal year 2003.

In addition to the transfer of appropriations associated with the State Program Improvement Grants and State Vocational Education Grants, an additional \$16.0 million in federal Perkins III funds will be transferred through a sub-grant agreement to the Illinois Community College Board for distribution to community colleges.

*Fiscal year 2002 funds were appropriated to the Illinois State Board of Education.

VI. ILLINOIS STUDENT ASSISTANCE COMMISSION

Illinois has been consistently recognized for its commitment to affordability; most recently with an "A" on the National Report Card. Fittingly, goal three of *The Illinois Commitment* states in part that "no Illinois citizen will be denied an opportunity for a college education because of financial need", confirming that the assurance of an affordable education remains a top priority. Meeting this goal requires a combination of reasonable costs to students and a program of student financial aid that provides support for those students least able to pay for college. These fiscal year 2003 recommendations will help sustain the state's commitment to affordability by promoting access to higher education through support for strong student financial aid programs, and they continue to recognize the Illinois Student Assistance Commission as a major partner in efforts to assure that higher education remains an affordable option for the citizens of the state.

The Board of Higher Education recently adopted the report and recommendations of its Committee on Access and Diversity, reconfirming the importance of a strong financial aid system in the face of unprecedented demand for higher education in Illinois. *Success for Today's Students*, the report of the Commission on Persistence and Degree Completion, further emphasized the importance of a strong system of student aid by acknowledging that efforts to improve persistence and degree completion should complement continuing efforts to expand access and opportunity and to maintain affordability.

Fiscal year 2003 recommendations for grant programs and administration of the Illinois Student Assistance Commission total \$455.1 million, an increase of \$19.5 million, or 4.5 percent, over fiscal year 2002 appropriations. The recommendation for federal loan program administration and loan reimbursements is \$267.2 million, a decrease of \$28.2 million, or 9.5 percent from the fiscal year 2002 level. A summary of the fiscal year 2003 recommendations for the Illinois Student Assistance Commission is presented on Table VI-1.

Monetary Award Program

The Monetary Award Program (MAP) provides grants on the basis of financial need to Illinois residents for undergraduate study in the state. The program is the third largest need-based program of its kind in the United States and provides annual awards of up to \$4,968 to cover a student's tuition and fees at a public or private college or university located in Illinois. The fiscal year 2003 recommendation totals \$395.7 million, an increase of \$20.1 million, or 5.4 percent, over fiscal year 2002 appropriations. The recommended funding level will support awards for a projected 137,200 students, 1,350 more than estimated for fiscal year 2002.

Funding for the Monetary Award Program comes from three sources: state general funds, the Monetary Award Program (MAP) Reserve Fund, and federal Leveraging Educational Assistance Partnership (LEAP) funds. Fiscal year 2002 appropriations and fiscal year 2003 recommendations are shown in the following table.

<u>Fund Source</u>	<u>FY2002</u>	<u>FY2003</u>
General Funds	\$367,528,300	\$387,628,300
MAP Reserve Funds	5,000,000	5,000,000
Federal LEAP Funds	<u>3,100,000</u>	<u>3,100,000</u>
Total	\$375,628,300	\$395,728,300

Public Act 89-0330 authorized the establishment of the MAP Reserve Fund in 1995, and thus far, the fund has been a largely untapped resource for the program. By statute, balances in the fund are limited to two percent of the annual Monetary Award Program appropriation, and monies may be used only for MAP grants. Since fiscal year 1998, the Commission has transferred nearly \$7.2 million from general funds appropriations for MAP to the Reserve Fund while expenditures have been limited to just \$507,500, leaving a current balance of just under \$6.7 million in the fund. In past years, annual allocations of Reserve Fund resources have been made available to meet resource requirements of the Monetary Award Program, but a thriving economy has assured that Reserve Fund allocations were unnecessary in meeting program demand through the end of fiscal year 2001. Both fiscal year 2002 appropriations and the fiscal year 2003 recommendations include \$5.0 million in spending authority for the MAP Reserve Fund.

General funds appropriations for the Monetary Award Program increased by \$187.7 million, or 104.3 percent, from fiscal year 1992 to fiscal year 2002. This increased support has allowed for a number of programmatic enhancements including: extension of eligibility to students attending proprietary institutions, students enrolled on a part-time basis, and students attending summer school; and extension of application processing deadlines for new and continuing students. Increased MAP funding has also helped to offset rising college costs and to support an expanding base of eligible recipients: the number of awards increased by 21,100, or 18.4 percent, over the ten-year period.

But while appropriations for the MAP have increased over the past decade, it is more difficult for a family to qualify for the MAP today than it was ten years ago. The program has seen an increasing number of applicants with relatively lower family income levels, and tighter eligibility requirements that allocate funds to those students with the greatest financial need. A greater number of students are receiving awards than a decade ago, but these recipients have lower incomes relative to their counterparts in the past. Even with increasing appropriations, the gap between college aid and college costs is growing. Increases in the maximum award primarily benefit students at independent institutions where tuition and fees routinely exceed the MAP maximum award, while new funding intended to accommodate increases in tuition and fees is of great benefit to students at public universities. To make college a viable option for low-income students, both the maximum and average awards must increase enough to offset college cost increases, and the MAP formula must recognize increases in direct costs incurred by students.

Maximum Award. Board of Higher Education policy calls for the Monetary Award Program maximum award to increase annually at a rate that is consistent with reasonable increases in tuition and fees. The fiscal year 2003 budget recommendations include \$9.7 million to increase the maximum award by \$198, from \$4,968 to \$5,166. Most MAP grant recipients at independent institutions, as well as those enrolled at the Urbana-Champaign and Chicago campuses of the University of Illinois and, potentially, some students at Northern Illinois University will benefit from an increase in the maximum award.

<u>Fiscal Year</u>	<u>Maximum Award</u>	<u>Dollar Increase</u>	<u>Percent Increase</u>
2000	\$4,530	\$210	4.9%
2001	4,740	210	4.6
2002	4,968	228	4.8
2003*	5,166	198	4.0

*Recommended

Tuition and Fees. The fiscal year 2003 recommendations include \$8.4 million to recognize projected fiscal year 2003 tuition and fee increases of 5.0 percent. This funding increase is intended to offset average tuition and fee increases for students at community colleges, public universities, and independent institutions. Over the past three years, the average annual increase in tuition and fees has been 6.2 percent (all sectors).

Volume Increases. These recommendations include \$2.0 million to address volume increases that have already had an adverse affect on Monetary Award Program funding in fiscal year 2002. In fiscal year 2002 to date, application volume is up nearly six percent and the number of eligible applications has increased by nearly five percent, forcing the suspension of award announcements on October 26, 2001. Award announcements were last suspended in fiscal year 1998. If the fallout from recent economic downturns continues to push up application volume, MAP resources will continue to be strained. Volume increases may require the expenditure of a considerable portion of the \$5.0 million MAP Reserve Fund allocation for the program this fiscal year, further reinforcing the need for funding to address the issue in fiscal year 2003.

Other Grant and Scholarship Programs: State Funds

In addition to the Monetary Award Program, the Illinois Student Assistance Commission administers a number of other student aid programs that provide assistance to students based on financial need, and still others that provide financial aid based on a student's academic performance, participation in the armed forces, intention to pursue a career in teaching, or other criteria. No major new initiatives are proposed for fiscal year 2003; however, a number of program changes and improvements are proposed. Narrative summaries of the various programs follow.

Illinois Veteran Grant Program. This program provides grants for tuition and fees at Illinois public universities and community colleges to Illinois residents who are veterans with at least one year of active duty. Illinois veterans who return to the state within six months of leaving the Armed Forces of the United States are eligible to receive grants equivalent to four years of full-time study at the undergraduate or graduate level. The \$19.5 million recommendation for the program in fiscal year 2003 is a decrease of \$500,000, or 2.5 percent, from the fiscal year 2002 appropriation. This recommendation is expected to fully fund projected claims. In fiscal year 2001, more than \$2.0 million were lapsed from the \$21.0 million appropriation, and the Commission expects to again lapse funding in fiscal year 2002. A weakening Illinois economy and increases in the size of the active duty armed forces will lead to additional demand for this program in the future. The Illinois Veteran Grant program is an entitlement; campuses are required to waive any tuition and fees not paid by the grant.

Illinois Incentive for Access. This program is designed to direct additional aid to students classified as freshmen who have no financial resources for college, thus supplementing aid from other need-based grant programs and promoting access and retention for a targeted group of students. It is a need-based program that provides a one-time \$500 grant to eligible freshmen applicants. The fiscal year 2003 recommendation for the program is \$7.2 million, unchanged from the fiscal year 2002 appropriation.

The Commission plans to reintroduce legislation in the upcoming legislative session to expand eligibility for the Illinois Incentive for Access program in fiscal year 2004. The Evaluation Advisory Committee (nine college presidents and one member of the Illinois Student Assistance

Commission) created in conjunction with the program has recommended a sliding scale for the program under which additional financial aid would be made available to freshmen with limited family income. Under the proposal, the maximum award available under the program would be doubled to \$1,000 with the largest awards directed to those with no family income and awards scaled downward as students' available income rises.

Quern Information Technology Grants. The Arthur F. Quern Information Technology (IT) Grant Program, named after a former Chairman of the Board of Higher Education, will enter its third year of operation in fiscal year 2003. This initiative of Governor Ryan and the Board is designed to increase the number of trained information technology professionals in the state, and for fiscal year 2003, level funding of \$3.0 million is recommended for the program. In fiscal year 2002, \$400,000 in new funding was used to annualize the program in its second year, provide funding for initial enrollments and to support renewal awards for a second year of study. The Quern IT program provides grants of up to \$2,500 for up to two years for students enrolled in eligible information technology programs at the undergraduate level. To receive priority consideration for an award, applicants must have previously received a baccalaureate degree and be pursuing an additional undergraduate degree or certification in an approved technology field. The Commission estimates that approximately 1,200 students will benefit from the program in each of fiscal years 2002 and 2003.

Higher Education License Plate Grants. In fiscal year 2003, \$70,000 are recommended for the Higher Education License Plate Grant Program. This amount is unchanged from the fiscal year 2002 appropriation level. No state general funds are used for the program; funding is provided through fees charged for specialized college license plates (\$25 of the \$75 plate fee goes to the grant fund). Participating public universities and community colleges administer their own scholarship programs with license plate fees flowing directly to the institutions in proportion with the number of license plates sold. This appropriation is simply pass-through funding for seven private institutions currently participating in the program.

Merit Recognition Scholarships. The fiscal year 2003 recommendation of \$6.1 million for the Merit Recognition Scholarship Program is a decrease of \$500,000, or 7.6 percent, from the fiscal year 2002 appropriation. The recommended funding level reflects anticipated demand for the program. Statutory changes expanded eligibility for the program in fiscal year 2001 to students who, at the end of their sixth semester, are in the top five percent of their high school class or who have a standardized test score at or above the 95th percentile. The scholarship is a non-need-based, non-renewable award of \$1,000, which must be used in the first year following the student's graduation from high school, and the program expansion has raised participation from 3,800 students in fiscal year 2000 (representing pre-expansion totals for students who ranked in the top five percent of Illinois high school graduates) to a projected level of 6,100 students in fiscal year 2003.

National Guard Scholarships. The Illinois National Guard Grant Program provides grants for the payment of tuition and certain fees at Illinois public universities and community colleges to students who are Illinois residents and who have served at least one year in the Illinois National Guard. Like the Illinois Veteran Grant Program, this is an entitlement program for eligible applicants, thus campuses are required to waive any tuition and fees not paid by the grant. The Commission expects to see additional demand for this program in future fiscal years. The fiscal year 2003 recommendation of \$4.5 million is unchanged from the fiscal year 2002 appropriation, and it is expected to fully fund awards to nearly 3,000 students.

Minority Teachers of Illinois Scholarship Program. This program awards scholarships of up to \$5,000 to minority students who agree to teach at least one year at a preschool, elementary, or secondary school where minority enrollment exceeds 30 percent for each year of scholarship assistance provided. Should a recipient fail to fulfill the teaching requirement, repayment of the award plus interest is required by the agreement. The fiscal year 2003 recommendation of \$3.1 million is unchanged from the fiscal year 2002 appropriation.

The current statute governing the program requires at least 30 percent of grant recipients to be male students, and despite efforts to change this requirement in recent years, a lack of qualified male applicants has led the Commission to lapse significant portions of program funding while turning away qualified female applicants. From funds appropriated for fiscal year 2001 (\$3.1 million), final awards totaled just less than \$2.3 million for 501 awards. Because current statutory requirements limit the ability to fully utilize resources made available for the program, a total of \$250,000 in program funding has been reserved for fiscal year 2002. The fiscal year 2003 recommendation will allow for approximately 620 awards. In the wake of ongoing teacher shortages, it is imperative that all resources available for the Minority Teachers of Illinois program be fully utilized next fiscal year.

David A. DeBolt Teacher Shortage Scholarship Program. The recommendation of \$2.9 million for fiscal year 2003 is unchanged from the fiscal year 2002 appropriation. The program is designed to encourage academically talented students to pursue preschool, elementary, or secondary school teaching in fields designated as teacher shortage disciplines by the Illinois State Board of Education. It provides scholarships of up to \$5,000 per year to students who agree to teach for at least one year for each year of scholarship assistance received, and like the Minority Teacher Scholarship Program detailed above, it includes a repayment plus interest provision for those who fail to fulfill the teaching requirement. In fiscal year 2002, the appropriation of \$2.9 million will allow for some 580 awards.

The Student Assistance Commission is recommending major changes for the DeBolt Program in fiscal year 2003. Specifically, the Commission is advocating the creation of a new ITEACH (Illinois Teacher Education Assistance Campaign) incentive program that would in effect revise and rename the DeBolt program as it is currently configured. The new program would in many ways echo the DeBolt program by providing \$5,000 scholarships to prospective teachers in designated teacher shortage disciplines, but would be competitive based on academic talent, financial need and minority status. In addition, \$1,000 non-repayable scholarships would be made available for freshman students.

Student-to-Student Grants. The Student-to-Student program is a campus-based grant program for public university and community college students who have financial need not met by other programs. The program matches state dollars with voluntary fees of up to \$9 paid by students at 12 participating institutions: Oakton Community College will be added in fiscal year 2003. The maximum award under this program is \$1,000, and the fiscal year 2003 recommendation of \$1.0 million is unchanged from the fiscal year 2002 appropriation.

College Savings Bond Grants. The Bonus Incentive Grant (BIG) program awards grants to holders of College Savings Bonds if they use the bond proceeds to pay for educational expenses at a college or university in Illinois. Awards are \$20 for each year a bond is held until maturity, up to a maximum of \$440 for a 22-year bond. The fiscal year 2003 recommendation of \$650,000 is an increase of \$30,000, or 4.8 percent, over fiscal year 2002 appropriations, and will fully fund the program.

Dependents Grants. The Dependents Grant programs provide grant assistance to children of Illinois police officers, firefighters, or correctional officers who are killed or permanently disabled in the line of duty. The grants give no consideration to financial need, and may be used for tuition and fees at public and private colleges and universities in Illinois. For fiscal year 2003, the Board recommends \$275,000 for the program, an increase of \$25,000, or 10 percent, over fiscal year 2002 appropriations. This recommendation will accommodate projected tuition and fee increases and provide for potential variations in program demand. Approximately fifty students per year typically benefit from this assistance category.

Other Grant and Scholarship Programs: Federal Funds

The Robert C. Byrd Honors Scholarship program provides a \$1,500 federal scholarship for undergraduate study at approved U.S. colleges and universities. Scholarships are allocated by geographic district to academically exceptional students who graduate in the top two percent of their graduating class, and who have at least a 3.8 grade point average on a four point scale or a composite score of 27 on the ACT. The fiscal year 2003 recommendation of \$1.8 million is unchanged from the fiscal year 2002 appropriation, and assumes a full federal allocation of funds for the program.

Administration

A total of \$7.6 million is recommended for administration for the Illinois Student Assistance Commission for fiscal year 2003. This amount is an increase of \$186,800, or 2.5 percent, over fiscal year 2002 appropriations. The recommendation includes funding for the following administrative components.

General Funds Program Administration. A total of \$6.7 million is recommended for fiscal year 2003, an increase of \$186,800, or 2.9 percent, over fiscal year 2002 appropriations. The recommendation includes funds for an average three percent salary increase, calculated on 95 percent of the personal services base, and for associated increases in employee benefit lines. Also included are funds for Recruiting and Retaining Critical Faculty and Staff Initiative, consistent with the decision rule applied for all higher education institutions and agencies. Also included is a total of \$75,000 to assist the Commission with federal cost allocation issues resulting from an imbalance in state and federal administrative funding for indirect costs at the agency. As an agency that administers both state and federal financial aid programs, the Commission is required by federal law to comply with federal cost allocation principles.

Higher-EdNet. These recommendations include \$65,000 from the Higher-EdNet Fund to support the operation of Higher-EdNet. The program also includes a general funds component, estimated at \$135,000 for fiscal year 2003, which was "institutionalized" or folded into the Commission's standard operating lines in fiscal year 2002. As the number of Internet applications rises (filed free of charge), revenues to the Higher-EdNet Fund will slow with the corresponding reduction in paper applications (\$10 filing fee required). Higher-EdNet provides Illinois residents with a single source for information regarding access to student financial aid, academic preparation for postsecondary education, school selection, and career planning.

Collections Activities. The fiscal year 2003 recommendations include \$300,000 from the State Accounts Receivable Fund for administrative expenses and related collection agency charges associated with the Minority Teachers of Illinois, DeBolt Teacher Shortage Scholarship and Special

Education Teacher Tuition Waiver programs. This amount is unchanged from the fiscal year 2002 appropriation, and will continue to allow the Commission to aggressively pursue collections from students who fail to fulfill the teaching obligations required by these programs.

Contracts and Grants Fund. A fiscal year 2003 recommendation of \$20,000 is included from the Contracts and Grants Fund. This recommendation is unchanged from the fiscal year 2002 appropriation. The Contracts and Grants Fund serves as the repository for funds received from not-for-profit organizations interested in assisting the Commission with joint outreach and training activities. Participating organizations will include, but are not limited to, the Illinois Association of Student Financial Aid Administrators (ILASFAA) and the Illinois Association of College Admission Counseling (IACAC).

Service Delivery Enhancements

Scholarship and Grant System Reengineering. A total of \$250,000 is recommended to support re-engineering of the Commission's scholarship and grant system. This amount is unchanged from the fiscal year 2002 appropriation. The re-engineering project would allow the Commission to update its mainframe systems, and to consolidate all scholarship and grant programs within the same framework. A new system would streamline the financial aid system in Illinois and give students the ability to seamlessly assess eligibility for all types of financial aid without the cumbersome processes currently required. It would speed the delivery of financial aid monies to students, reducing cash flow problems and reliance on short-term loans for continuously enrolled students. Re-engineering is a long-term project with more than \$1.5 million in state general funds required to complete the upgrade.

Adult Outreach Activities. A total of \$300,000 is recommended for the continuation of outreach efforts targeted specifically to adult learners. This program was first funded at the same \$300,000 level in fiscal year 2002 with first-year funding being utilized for personnel (one new position in Client Relations), a contract with the Council for Adult and Experiential Learning (CAEL) to promote the Commission's programs to adults in the Chicago-land area, development of a separate Web page focusing on information for adult students, and for printing for specialized brochures, posters, and other publications. Fiscal year 2003 funding would allow for the addition of one new outreach position and for the continuation of similar outreach activities next fiscal year.

Loan Program Administration and Loan Reimbursements

The Illinois Student Assistance Commission administers federally guaranteed student loan programs for Illinois residents enrolled in higher education institutions in Illinois or other states. These programs facilitate student borrowing from commercial financial institutions and provide lenders with numerous support services. The Commission derives funding for student loan operations entirely from non-state funding sources. All expenditures are from the Federal Student Loan Fund (FSLF), the Student Loan Operating Fund (SLOF), or the Federal Reserve Recall Fund (FRRF). The fiscal year 2003 budget recommendations include \$267.2 million for loan reimbursements, loan program transfers, and administration. This amount is an overall decrease of \$28.2 million, or 9.5 percent, from fiscal year 2002 appropriations with decreases reflecting procedural changes and reductions in appropriation ceilings.

The recommendation for loan program administration totals \$33.7 million, an increase of \$1.5 million, or 4.8 percent. This funding level will support salary increases for staff and related

personal services costs, as well as normal operating expenses associated with program administration. The recommendations also include \$13.0 million in spending authority for repayment of the Working Capital Transfer loan that provided the Student Loan Operating Fund with initial capital after its creation on October 1, 1998. Under federal law, the amount of the initial transfer to the new fund could not exceed 180 days operating expenses and was to be repaid within four years of the date of the transfer. Based on a strong cash position in the Student Loan Operating Fund, the Commission projects that the repayment can be made ahead of schedule in either fiscal year 2002 or 2003.

VII. GRANT PROGRAMS AND SPECIAL INITIATIVES

The Board of Higher Education administers several state and federally funded grant programs, including financial assistance for nonpublic institutions, health education grants, and various institutional grants. Last year, the Board received the results from a comprehensive examination of these grant programs. While individual grant programs and projects have been evaluated on a regular basis, the Board had not previously undertaken a comprehensive examination of the grant programs collectively, as a set of tools to achieve the goals of higher education. The evaluation focused on the goals of *The Illinois Commitment* and the extent to which the grant programs collectively contribute to achievement of the six statewide goals. During the fiscal year 2002 budget development process two of the budgetary practice changes suggested in the evaluation report were implemented. These changes resulted in the renaming of Higher Education Cooperation Act (HECA) grant categories to more accurately reflect alignment with the six statewide goals of *The Illinois Commitment*, and the transfer of \$5.0 million in funding for a limited number of long-term HECA projects to institutional or agency base budgets. Legislation initiated during the spring 2001 legislative session further implemented recommendations included in the comprehensive evaluation.

The Board also administers funds for other special initiatives such as the Illinois Century Network, the University Center of Lake County, and the Illinois Consortium for Educational Opportunity Program. The Illinois Century Network and the University Center of Lake County are projects initiated by the Board of Higher Education. The Illinois Consortium for Educational Opportunity Program provides financial assistance to minority students enrolled in graduate programs in certain Illinois colleges and universities. The appropriations for these initiatives are project specific. Additional information concerning these initiatives is presented in the sections that follow.

Tables VII-1 through VII-3 summarize the fiscal year 2003 recommendations for each grant program and initiative. The grant programs and initiatives are presented in accordance with their relationship to advancing the statewide goals articulated in *The Illinois Commitment*.

Access and Diversity

The fiscal year 2003 budget recommendations for grant programs and initiatives that advance Goal 4 of *The Illinois Commitment* for increasing the number and diversity of citizens completing training and education programs total \$60.5 million, an increase of \$905,000, or 1.5 percent, over fiscal year 2002 appropriations. The recommendations for fiscal year 2003 are displayed on Table VII-1.

Financial Assistance Act for Nonpublic Institutions of Higher Learning. Independent colleges and universities play an important role in implementing *The Illinois Commitment*. According to preliminary figures from the Board of Higher Education's Fall 2001 Enrollment Survey, enrollment at independent institutions accounted for 29 percent of total headcount enrollment in Illinois colleges and universities in fall 2001. Independent colleges and universities provide instruction in almost every discipline, and awarded 42 percent of the bachelor's degrees, 60 percent of the master's degrees, and 68 percent of the first professional and doctoral degrees conferred by Illinois colleges and universities during the 1999-2000 academic year.

The Financial Assistance Act for Nonpublic Institutions of Higher Learning provides direct grants to nonprofit, independent colleges and universities to preserve and enhance the

educational opportunities available to students. Historically, these grants emphasized capacity and have been based on the number of Illinois residents enrolled in undergraduate programs at each eligible institution. Recognizing the importance of persistence and completion, and following up on recommendations made in *Evaluation of the Grant Programs* (September 2000), staff sought statutory changes to realign this program more closely with the goals of *The Illinois Commitment*. Public Act 92-0045, enacted during the spring of 2001, authorizes the Board to consider degrees awarded, as well as enrollments in distributing Financial Assistance Act grants beginning in fiscal year 2003. Currently, Board staff is working with the Federation of Independent Illinois Colleges and Universities to develop a new allocation formula that bases the grant allocation on a combination of enrollments and degrees conferred. The fiscal year 2003 recommendation for Financial Assistance Act grants is \$22.8 million, a \$600,000 increase over the fiscal year 2002 appropriation. This additional funding is expected to support institutional efforts to bring teacher education programs up to National Council for Accreditation of Teacher Education (NCATE) standards, for independent institutions that currently have such programs. Staff will work with FIICU to develop an accountability plan for demonstrating that this intention is met.

The Illinois Century Network. The Illinois Century Network (ICN) is a telecommunications backbone that provide state-of-the-art, high-speed access to data, video, and audio communications for schools, libraries, colleges, and universities. One of the original design goals for the ICN was to build on existing state networks. LincOn was operated by the Illinois State Board of Education for four years prior to the creation of the ICN and is the foundation upon which the ICN is built. As of September 2001, a total of 5,466 institutions, agencies, schools and libraries have been connected to the Network. Over two million Illinois citizens, primarily students, are served by the ICN.

Funding for the ICN was provided for the first time in fiscal year 2000. In fiscal year 2002, \$15.0 million were appropriated to the Board of Higher Education and \$12.0 million were appropriated to the Illinois State Board of Education for this purpose. The initial appropriations supported costs related to development, administration, and content. The fiscal year 2003 recommendations total \$27.0 million, proposing a transfer of \$12.0 million from to the Illinois State Board of Education to the Board of Higher Education. The recommendations provide for level funding of this initiative in fiscal year 2003.

Graduation Incentive Grant Program. Public Act 90-750 created the Graduation Incentive Grant Program to offer financial incentives to public universities to develop programs to assist students in completing a baccalaureate degree within four years. Allocation of these grant funds is based on the number of students enrolled in such programs. In its report *Success for Today's Students* (October 2001), the Commission on Persistence and Degree Completion recommended that colleges and universities develop contractual agreements that guarantee courses and other institutional services will be available so students can complete a degree in the customary timeframe, assuming students take a full-time course load and meet other provisions. The GradTrac program at Western Illinois University features such a contractual agreement; the University is the only institution that has received these grants to date. A total of \$150,000 is recommended for the Graduation Incentive Grant Program for fiscal year 2003, an increase of \$75,000 over the fiscal year 2002 appropriation.

University Center of Lake County. Following a comprehensive review of the educational needs of the north Chicago suburban area, the Board of Higher Education endorsed a proposal to create the University Center to expand educational opportunities for baccalaureate

degree completion and master's degree programming for the residents of Lake County. A collaborative institution, the University Center of Lake County has the mission to provide resources and staff to facilitate the efforts of its 12-member institutions to develop and deliver off-campus instructional programs in the area. There were 1,053 students enrolled in 107 courses and 45 degree programs offered through the Center in spring 2001.

The fiscal year 2003 recommendation for the operation of the University Center of Lake County totals \$1.1 million, an increase of \$25,000, or 2.4 percent, over fiscal year 2002.

Quad-Cities Graduate Study Center. The Quad-Cities Graduate Study Center is a cooperative regional academic center that receives support from both Illinois and Iowa and provides educational services from public and private institutions in both states. Graduate instruction is scheduled at the Center on a regular basis for residents of the Quad-Cities metropolitan area that includes Rock Island and Moline, Illinois, and Davenport and Bettendorf, Iowa. The Illinois appropriation to the Center is matched by a similar appropriation from the state of Iowa. A total of \$225,000 is recommended for the Quad-Cities Graduate Study Center in fiscal year 2003. The recommendation represents an increase of \$5,000, or 2.3 percent, over fiscal year 2002.

Illinois Consortium for Educational Opportunity Program. The Illinois Consortium for Educational Opportunity Act authorizes financial assistance to encourage minority students to enroll in and complete graduate degree programs. The objective of the program is to improve the representation of minority faculty and administrators in Illinois higher education. To be eligible for a grant, a student must be an Illinois resident who is unable to pursue a graduate or professional degree without financial assistance. Award recipients must agree to accept a position at an Illinois higher education institution, or in an education-related function at a state agency, upon completion of the degree. A Consortium Board composed of representatives of the public and private higher education institutions participating in the program, annually conducts an application and selection process to determine award recipients. Public Act 92-0045 authorizes the Consortium Board to make an annual determination regarding the maximum award amount. In fiscal year 2002, the Executive Committee of the Consortium Board nominated 48 new awardees and 115 continuing awardees, for a total of 163 recipients. A total of \$2.1 million is recommended in fiscal year 2003 for the Consortium for Educational Opportunity Act grants. The recommendation represents an increase of \$100,000, or 5.0 percent, over fiscal year 2002.

Higher Education Cooperation Act – Access and Diversity. The objectives of the program include motivating elementary and secondary students to pursue higher education, enhancing academic skills in basic subject areas, improving college retention rates, and strengthening and expanding the student pipeline for professional school programs. The programs funded through these grants serve a wide range of student age groups, from early elementary school through graduate and professional school, advancing Goal 4 of *The Illinois Commitment* by contributing to an increase in the number and the diversity of citizens completing training and education programs.

Examples of projects supported in fiscal year 2002 include: the Illinois Minority Graduate Incentive Program that provides financial assistance to minority graduate students; the Illinois Scholars (The Golden Apple Scholars of Illinois), a pre-service recruitment and preparation program designed to prepare teachers; and the Chicago Area Health and Medical Careers Program that works with students beginning in middle school to prepare them for careers in the health field.

These grants also support efforts to improve the transfer rate of students from community colleges to baccalaureate institutions, promote access for underrepresented groups, and for other short-term articulation initiatives. The fiscal year 2003 recommendation continues support for a network of transfer centers aimed at minority students on community college campuses. The grants also support faculty and staff development initiatives designed to improve the social and academic climate for a diverse student population and bring together faculty from community colleges and universities to develop course and program articulation agreements to facilitate student transfer. Transfer centers provide a readily identifiable place on campus that is accessible to students as a focal point of transfer functions. In addition, these grants supported a variety of other activities in fiscal year 2002, including the Degree Completion Program (Bradley University), projects designed to enhance success for students with disabilities, and programs that encourage cooperation with community-based organizations.

The fiscal year 2003 recommendation for the Higher Education Cooperation Act includes \$7.2 million for grants to support Access and Diversity projects, an increase of \$100,000, or 1.4 percent, over fiscal year 2002.

Workforce and Economic Development

The fiscal year 2003 budget recommendations for grant programs and initiatives that advance statewide goals to help Illinois business and industry sustain strong economic growth (Goal 1 of *The Illinois Commitment*) total \$49.5 million, an increase of \$295,600, or 0.6 percent, over fiscal year 2002 appropriations. The recommendations for fiscal year 2003 are displayed on Table VII-2.

Health Services Education Grants. The Health Services Education Grants Act authorizes the appropriation of funds to the Board of Higher Education for allocation to independent institutions offering programs that educate and train health professionals. Public Act 92-0045 provides the Board with the flexibility to use both enrollments and degrees as bases for allocation of these grants beginning in fiscal year 2003. Historically, these grants have been based on the number of Illinois residents enrolled in such programs. Health education grants assist institutions in meeting the high cost of health education programs while assuring that the state of Illinois has an adequate supply of health professionals. In addition, health education grants assist institutions and the state of Illinois in providing health professionals for underserved geographic areas and improving opportunities for students, particularly minority students, to pursue careers in the health professions.

A total of \$17.9 million is recommended for Health Services Education Grants in fiscal year 2003, a reduction of \$354,400. This level of support is expected to fully fund anticipated enrollments in the programs supported with this grant: medical, dental, optometric, podiatric, pharmacy, allied health (including physician assistant), nursing, and medical residency.

State Matching Grant Program. Illinois colleges and universities make a significant contribution to the economic well being of the state through innovative research and the development of partnerships with business and industry. Funding agencies are increasingly requiring academic institutions to provide matching funds for projects to demonstrate state and institutional commitment. The State Matching Grants Program is designed to provide funds for Illinois colleges and universities to pledge as matches for sponsored grants from the federal government and other sources. Research projects become eligible for submission after a federal

or other sponsoring agency has committed to fund the research project and after the college has pledged the required match.

State Matching Grant funds enable institutions to compete for new external grants and leverage additional funding. The program is a performance-based program; grant funds may only be used for the matching contribution required for new research projects. A team of external researchers is conducting an evaluation of the Matching Grant Program. The evaluation will answer questions relating to the research funds that have come to Illinois as a result of the program and what benefits have accrued to Illinois citizens as a result of the projects supported by the program. Fifteen institutions participated in the State Matching Grant Program in fiscal year 2002. The fiscal year 2003 recommendation for the State Matching Grant program totals \$10.0 million, the same amount appropriated for fiscal year 2002.

Advanced Photon Source - Argonne National Laboratory. The fiscal year 2003 recommendations support university research activities using the Advanced Photon Source (APS) at Argonne National Laboratory. The APS is a national synchrotron radiation research facility funded by the United States Department of Energy at a total cost in excess of \$1.0 billion. The facility contains the world's largest and most powerful X-ray machine. Researchers from the following Illinois universities participate collaboratively with scientists from private industry and the federal government in using the high powered X-ray beams for applied and basic research: Northwestern University, the University of Illinois at Urbana-Champaign, Illinois Institute of Technology, Northern Illinois University, Southern Illinois University Carbondale, and The University of Chicago. Grant funds are used for research in materials science, chemistry, geophysics, environmental science, and structural biology. The fiscal year 2003 recommendation for APS totals \$3.0 million, the same amount appropriated for fiscal year 2002.

Illinois Consortium for Accelerator Research (ICAR). Funds were provided for the first time in fiscal year 2001 to support the efforts of five Illinois universities that comprise the Illinois Consortium for Accelerator Research. The Consortium includes representatives from the Illinois Institute of Technology, Northern Illinois University, Northwestern University, The University of Chicago, and the University of Illinois at Urbana-Champaign. The research program of the Consortium is designed to ensure that Fermilab remains the best choice of future research in accelerator technology and physics. Grant funds support collaborative research with Fermilab involving faculty and students from physics and engineering departments, and Outreach and Public Awareness Program designed to promote public awareness of the intellectual and economic importance of Fermilab to the State of Illinois. The fiscal year 2003 budget recommendations include \$2.5 million from the Tobacco Proceeds Settlement Fund to support the work of the Consortium, the same amount appropriated for fiscal year 2002.

Engineering Equipment Grants. This program provides matching grants to eligible institutions for the purchase of engineering laboratory equipment and computer software. Distribution of these grants is based on the number of engineering degrees awarded by public and private institutions offering accredited engineering programs. The grants, which must be matched by funds from private sources, enable recipient institutions to purchase equipment and software to maintain state-of-the-art laboratories necessary to train students for the needs of Illinois industry. At the statutorily authorized maximum grant rate of \$1,200, the recommendation for fiscal year 2003 would support 2,333 engineering degrees. In fiscal year 2002, the actual number of engineering degrees reflected in approved grant applications totals 2,305. Three independent institutions and five public universities with Colleges of Engineering are eligible to receive these grants in fiscal year 2002; grant amounts range from \$108,000 for

Southern Illinois University Edwardsville to \$1.2 million for the University of Illinois at Urbana-Champaign. A total of \$2.8 million is recommended in fiscal year 2003 for the Engineering Grant Program, the same amount appropriated for fiscal year 2002.

Veterinary Medicine. In fiscal year 2002, Governor Ryan's *VentureTech* initiative identified a number of projects to be supported by Tobacco Settlement Funds. In fiscal year 2002, a total of \$1.5 million in Tobacco Settlement Funds was appropriated to the Board of Higher Education for a grant to the University of Illinois to support studies in veterinary medicine. Specifically, this funding will support ongoing research in veterinary medicine in areas where there is a societal need and where the College has current faculty strengths. The fiscal year 2003 recommendation includes \$2.0 million in Tobacco Settlement Funds for veterinary medicine research, an increase of \$500,000 over fiscal year 2002 appropriations.

Medical Scholarship Program. The Family Practice Residency Act authorizes the Illinois Department of Public Health to award scholarships to Illinois residents who are attending Illinois medical schools and who, in return for such scholarships, agree to practice in those areas of the state demonstrating the greatest need for medical care. Financial need and willingness to complete the residency requirement in a medical shortage area are among the factors considered by the Department in awarding these scholarships that provide both tuition and a stipend for living expenses. Historically, minority students have received a significant proportion of these scholarships. Fiscal year 2003 recommendations provide \$3.4 million for this scholarship program, the same amount appropriated for fiscal year 2002.

Cooperative Work Study Program. The Illinois Cooperative Work Study Act authorizes the Board of Higher Education to award grants to public and nonpublic institutions of higher education to support student cooperative work-study programs. The program plays an important role in carrying out the Board's workforce preparation policies. The Act stipulates that grants should support cooperative work-study programs that benefit students academically and financially, reduce reliance on loans, enhance public-private sector partnerships, and encourage students to seek permanent employment in Illinois. Forty-four grants were awarded in fiscal year 2001, supporting work-study opportunities for an estimated 2,900 students. Fiscal year 2003 recommendations for this program total \$2.1 million, the same amount appropriated for fiscal year 2002.

State Geological Survey. The Illinois State Geological Survey is one of four scientific surveys and centers of the state of Illinois. These surveys are part of the Illinois Department of Natural Resources, but are affiliated with the University of Illinois at Urbana-Champaign. Responsibilities of the Illinois State Geological Survey include mapping the state's geology at a detailed scale; and acquiring, assembling, interpreting, and making useful geologic information available to Illinois citizens. In fiscal year 2002, the \$1.6 million grant supported ongoing research, education programs, and operating needs of the Survey. The fiscal year 2003 recommendation for this program is \$1.6 million, the same amount appropriated for fiscal year 2002.

International Career Academy/International High School. In fiscal year 2002, the International Career Academy was established by the Illinois Mathematics and Science Academy, working with the Illinois Consortium on International Education, the Governor's Joint Task Force on International Education, state education agencies and other governmental agencies, and private sector business and industry. The Academy provides a graduated career practicum for high school

students who have demonstrated a sustained interest in international studies. In fiscal year 2002, a total of \$175,000 was appropriated to support this initiative.

In addition, a total of \$500,000 was provided in fiscal year 2002 to support an International High School initiative. The University of Illinois at Urbana-Champaign and the Illinois Consortium on International Education, in collaboration with educational agencies and professional educational organizations in the public and private domain, will support the development and implementation of this program. The purpose of the initiative is to better prepare students, as well as their teachers, for their role in a culturally diverse workforce and provide them with the tools necessary to contribute to Illinois global competitiveness. The fiscal year 2003 recommendation for these two programs totals \$675,000, the same amount appropriated for fiscal year 2002.

Higher Education Cooperation Act – Workforce and Economic Development. These grants support cooperative economic development initiatives involving Illinois colleges and universities, local school districts, and Illinois businesses that help Illinois sustain strong economic growth. Workforce training and economic development initiatives aimed at promoting college and university assistance to Illinois business and industry in sustaining strong economic growth. The grants recognize the special capabilities and geographical location of Illinois colleges and universities and leverage their efforts to improve the productivity and competitiveness of small- and medium-sized manufacturers--particularly in cooperation with the Illinois Manufacturing Extension Center and the Chicago Manufacturing Center. The grants also support the use of technology to expand and enhance the delivery of instruction and in workforce preparation and development. A total of \$3.5 million is recommended in fiscal year 2003, an increase of \$150,000, or 4.5 percent, over fiscal year 2002 appropriations.

Teaching and Learning

The fiscal year 2003 budget recommendations for grant programs and initiatives that advance statewide goals to support improvements in teaching and learning at all levels total \$8.0 million, an increase of \$50,000 over fiscal year 2002 appropriations. The recommendations include \$4.5 million in state general funds support and \$3.5 million in federal funds. The recommendations for fiscal year 2002 are displayed on Table VII-3.

Dwight D. Eisenhower Professional Development Program. The federally funded Dwight D. Eisenhower Professional Development Program grants provide funding for the improvement of mathematics and science education in elementary and secondary schools. The Board of Higher Education distributes federal funds made available for higher education programs on a competitive basis. These funds support professional development, retraining, and in-service programs offered by colleges and universities for elementary and secondary school teachers of mathematics and science. The projects are developed and implemented in cooperation with local school districts to meet needs defined by the districts. In fiscal year 2003, spending authority of \$3.5 million, the same amount as the current fiscal year, is recommended for this program.

Higher Education Cooperation Act – Teaching, Learning, and Quality. *The Illinois Commitment* calls for higher education to join elementary and secondary education to improve teaching and learning at all levels. Teaching, Learning, and Quality Grants support projects that address school-college partnerships that foster local collaboration to better integrate elementary and secondary schools, community colleges, and four-year institutions. The objectives of the grants are to encourage institutional cooperation with the involvement of local communities to achieve an effective and efficient use of educational resources, to extend access to educational

services throughout the state, to support cooperative library initiatives, and to develop innovative approaches for delivering educational services. Examples of projects supported in fiscal year 2002 include the Illinois Articulation Initiative, the Illinois Scholars teacher preparation program, and the Illinois Virtual High School.

In fiscal year 2003, these grants will support cooperative institutional efforts designed to improve student learning, and to improve student persistence, completion, and performance. Grants also will support activities that promote the effective use of assessments, accountability measures, and indicators of quality. Programs supporting professional development opportunities to ensure that classroom teachers teach to the Illinois Learning Standards will be supported. The grants will place priority on projects involving institutional matching funds, and also target resources to cooperative efforts to enhance current teacher education programs to ensure graduates of those programs can teach to the Illinois Learning Standards and to cooperative efforts to ensure that colleges of education meet NCATE standards. A total of \$4.5 million is recommended for Higher Education Cooperation Grants for Teaching, Learning, and Quality in fiscal year 2003, an increase of \$1.1 million over fiscal year 2002.

VIII. AGENCIES

Illinois Mathematics and Science Academy

The Illinois Mathematics and Science Academy is a residential institution for sophomore, junior, and senior high school students who are gifted in the fields of mathematics and science. The mission of the Academy is twofold: to offer a full curriculum and challenging educational experiences for its students, and to promote excellence and provide service to all Illinois educators with programs aimed at improving instruction and curricula in mathematics, science, and technology.

Fiscal year 2003 recommendations for the Illinois Mathematics and Science Academy total \$18.9 million, an increase of \$363,400, or 2.0 percent, above fiscal year 2002 appropriations. The recommendations include \$16.9 million from state general funds and \$2.1 million from the Illinois Mathematics and Science Academy Income Fund. The Academy's general funds budget recommendation of \$16.9 million represents an increase of \$363,400, or 2.2 percent, over fiscal year 2002. The recommendations provide funding for an average three percent salary increase for faculty and staff, the Recruiting and Retaining Critical Faculty and Staff initiative, and a three percent increase in Social Security/Medicare. The income fund recommendation of \$2.1 million represents no change from fiscal year 2002.

The fiscal year 2003 recommendation for the Illinois Mathematics and Science Academy is presented on Table VIII-1.

State Universities Civil Service System

The State Universities Civil Service System provides a program of personnel administration for state universities and higher education agencies. The State Universities Civil Service System operates under the authority of the Universities Civil Service Merit Board. All appointments and promotions at state universities and higher education agencies, with the exception of faculty, administrative, and student employees, are made based on examinations administered by the System. Included in the powers and duties of the Merit Board are approval of classification plans, prescription of ranges of compensation, provision of standards of examination, and recruitment of personnel.

A total of \$1.5 million is recommended for fiscal year 2003 for the State Universities Civil Service System, an increase of \$33,300, or 2.3 percent, over fiscal year 2002 appropriations. The recommendation is based on the same budget decision guidelines used for all higher education institutions and agencies, providing funds for an average three percent salary increase, the Recruiting and Retaining Critical Faculty and Staff initiative, and a three percent increase in Social Security/Medicare.

The fiscal year 2003 recommendation for the State Universities Civil Service System is presented on Table VIII-2.

Board of Higher Education

Fiscal year 2003 recommendations for the Board of Higher Education office operations total \$13.5 million, including \$10.1 million in spending authority from the federal contracts and grants fund. The recommendation for state general funds totals \$3.4 million, an increase of

\$76,600, or 2.3 percent, over fiscal year 2002 appropriations. The recommendations provide funding for an average three percent salary increase, the Recruiting and Retaining Critical Faculty and Staff initiative, and a three percent increase in Social Security/Medicare. The amount recommended for the Board of Higher Education also includes \$25,000 for the Illinois Occupational Information Coordinating Council, the same level of support provided during the current fiscal year.

The fiscal year 2003 recommendation for Board of Higher Education office operations is presented on Table VIII-3.

State Universities Retirement System and Group Insurance

The State Universities Retirement System administers retirement annuities and other benefits, including death, disability, and survivors benefits, for employees of state universities, community colleges, and higher education agencies. Group health insurance benefits for employees of public universities and higher education agencies and for retirees of community college districts (excluding City Colleges of Chicago) are administered by the Department of Central Management Services.

The fiscal year 2003 recommendation for the State Universities Retirement System and group health insurance is summarized on Table VIII-4 and includes a general funds increase of \$29.5 million, or 11.3 percent.

Retirement Contributions. Public Act 88-0593, enacted in 1994, revised the minimum annual state contribution to the State Universities Retirement System and four other state-supported retirement systems. The Act requires the minimum contribution to be an amount that, when added to other sources of employer contributions, is sufficient to meet the normal cost of maintaining the system and increase the funding ratio to 90 percent by 2045. The statute provided for a 15-year phase-in of this funding requirement beginning in fiscal year 1996. Annually, the State Universities Retirement System is to certify by November 15 the amount necessary to meet this statutory requirement, and this amount is appropriated without any further action required by the General Assembly and Governor. In accordance with statutes, this certification is based on the system's funding ratio on June 30.

The State Universities Retirement System has certified a total of \$301.6 million as the amount necessary to meet statutory funding requirements in fiscal year 2003. The state appropriated requirement is \$269.6 million, an increase of \$29.2 million, or 12.2 percent, over fiscal year 2002. This requirement assumes an additional contribution of \$32.0 million will be made for employees paid from federal grants and contracts and trust funds. Of the total state appropriation requirement of \$269.6 million, \$261.6 million is required from state general funds and \$8.0 million is expected to be available from the State Pensions Fund.

Public Act 90-19 requires the state retirement systems to carry investments "at a value determined in accordance with generally accepted accounting principles," enabling the state to comply with the Governmental Accounting Standards Board Statement 25 which requires public pension systems to report assets on a market value basis effective July 1, 1996. Recent actuarial losses from the investment markets have resulted in a funding ratio of total assets to total liabilities that decreased from 88.2 percent on June 30, 2000, to 72.1 percent on June 30, 2001, making necessary an increase of this magnitude to comply with statutory requirements.

Retirees Health Insurance. Public Act 90-497 created a program to provide health insurance for retirees of community college districts. The budget recommendations for the State Universities Retirement System include the amount certified by the System to be transferred to the Department of Central Management Services to administer the health insurance program for retired community college faculty and staff. This program is funded through four funding sources: state appropriations, contributions paid by retirees, contributions from current community college employees, and payments made by each local community college district. The State Universities Retirement System is to certify by November 15 the amount necessary to meet this statutory requirement, and this amount is appropriated without any further action required by the General Assembly and Governor. The state funding requirement for this program in fiscal year 2003 is \$2,960,315, or \$8,013 less than in fiscal year 2002.

Group Health Insurance. Historically, funds for costs related to the group health insurance program covering public university and higher education agency employees were appropriated to the Department of Central Management Services. In fiscal year 2002, funds were appropriated for the first time to the Board of Higher Education for transfer to the Health Insurance Reserve Fund, reflecting higher education's share of the increased costs incurred for the program. The fiscal year 2003 recommendations include \$14.8 million for this purpose, the same amount that was appropriated in fiscal year 2002.

CAPITAL IMPROVEMENTS

FISCAL YEAR 2003 CAPITAL RECOMMENDATIONS

The fiscal year 2003 recommendations for higher education capital improvements include Capital Renewal and Regular Capital projects to protect and enhance the state's current investment in higher education facilities at 12 public universities, 48 community college campuses, and the Illinois Mathematics and Science Academy.

The recommendations continue funding for Capital Renewal to address infrastructure repair and maintenance requirements and upgrade academic and instructional space for colleges and universities. These projects involve minor remodeling of facilities to repair buildings' exteriors; to upgrade electrical, mechanical, roofing, and plumbing systems; and to address safety and accessibility code requirements. Capital renewal projects also involve remodeling of classroom and laboratory areas for current educational and research program requirements. Capital Renewal projects are generally of lesser size and scope than Regular Capital projects and generally will reduce the backlog of deferred maintenance on college and university campuses.

The fiscal year 2003 recommendation for Capital Renewal projects and the funds for remodeling, site improvements, and utilities projects included in the recommendations for Regular Capital projects, will allow colleges and universities to make progress in addressing deferred maintenance. The fiscal year 2001 budget recommendations presented a multi-year plan to reduce the \$1.2 billion backlog of deferred maintenance to below \$50.0 million in approximately ten years. A fall 2001 update of the multi-year plan indicates approximately 12 years will be necessary to reduce the deferred maintenance backlog to about \$75 million. The update made adjustments reflecting the latest estimates of deferred maintenance provided by colleges and universities; the estimated annual expenditures needed for the maintenance of facilities based on the Space Realignment, Renewal and Replacement (SR³) formula; spending projections; and a review of major remodeling projects that will reduce the deferred maintenance backlog. Data provided indicate higher education institutions are allocating the new state resources dedicated to deferred maintenance from prior years, along with the required institutional match, to help reduce the backlog. Although the reduction of the deferred maintenance backlog continues to be a priority for the Board, the austere economic environment has resulted in no new general funds being recommended for deferred maintenance in fiscal year 2003.

The recommendations for Regular Capital provide funding for 42 projects, including 23 major remodeling projects designed to upgrade existing buildings to meet current use and code requirements and improve campus utilities and sites. Planning funds for a major renovation projects on one campus is recommended. The Regular Capital recommendations include funds for construction and equipment to complete three new facilities on three public university campuses and planning for the construction of new facilities at two campuses. Funds to complete the University Center of Lake County also are recommended. Eleven new community college facilities, or additions to existing facilities are recommended.

The fiscal year 2003 recommendations for higher education capital improvements total \$443.7 million from requests totaling nearly \$1.1 billion. Specific components of the recommendations include:

- \$30.0 million for Capital Renewal projects, including \$20.0 million in Capital Development Funds and \$10.0 million in Build Illinois Bond Funds. Fiscal Year 2003 is the fourth year of the five-year, \$50.0 million Illinois FIRST initiative to provide \$10.0 million each year for Capital Renewal projects at public universities and community colleges. The recommendation includes \$20.9 million for public universities and \$9.1 million for community colleges.
- \$413.7 million for Regular Capital projects, including \$214.0 million for public universities, \$179.7 million for community colleges, \$11.0 million for the Illinois Mathematics and Science Academy, and \$9.0 million for the University Center of Lake County.

Five projects recommended for funding in fiscal year 2003 will require an out-year commitment of capital resources totaling \$114.1 million. A list of these projects is presented on Table J.

In fiscal years 2001 and 2002, the General Assembly approved and Governor Ryan signed capital appropriations that included a number of projects from Governor Ryan's original *VentureTECH* program and additional projects recommended by the Illinois Coalition. The program was implemented to support science, biotechnology and information technology research and development; promote the creation of new businesses and products resulting from that research; and strengthen the skills of the Illinois workforce. A list of funded capital projects for fiscal years 2001 and 2002 follows.

Appropriations for *VentureTECH* Projects

(dollars in thousands)

<u>Institution</u>	<u>Project</u>	<u>Fiscal Year 2001</u>	<u>Fiscal Year 2002</u>
<u>Southern Illinois University</u>			
School of Medicine Edwardsville	Cancer Center		\$14,500.0
	Advanced Technology Worker Training Center		1,100.0
<u>University of Illinois</u>			
Chicago	Medical Imaging Facility	\$10,000.0	
	Advanced Chemical Technologies Building Planning		6,400.0
	Oncology Center, Peoria, Planning		1,500.0
Urbana-Champaign	Siebel Computer Center	8,000.0	32,000.0
	Post-Genomics Institute	7,500.0	67,500.0
	National Center for Supercomputing Application	3,000.0	27,000.0
	Technology Incubator	3,000.0	5,000.0

In the spring 2001 legislative session, the General Assembly and Governor approved a five-year, \$250.0 million construction program for Illinois' community colleges to reduce their reliance on temporary facilities. The funds may be used to replace existing temporary buildings with new facilities or to provide modifications to temporary buildings to make them permanent structures. In March 2001 community colleges reported having approximately 1.4 million GSF of temporary space. A total of \$50.0 million was appropriated in fiscal year 2002. To date, these funds have not been released for expenditure.

While *VentureTECH* projects and the Community Colleges Enhanced Construction Program are not included in the Board's recommendations for capital projects, the Board continues to support these initiatives.

Capital Renewal

The highest priority of the fiscal year 2003 budget recommendations is Capital Renewal to provide critical remodeling and infrastructure improvements that maintain and protect the state's investment in educational facilities on the campuses of public universities and community colleges. These projects recognize the continuing need to address infrastructure requirements and to upgrade academic and research space for colleges and universities.

Accordingly, the fiscal year 2003 capital budget recommendations include \$30.0 million to allow each institution to upgrade facilities and undertake repairs that otherwise may be deferred. Funds are allocated based upon the state-supported gross square footage of space for each campus. Recommendations for public university Capital Renewal projects total \$20.9 million. Recommendations for community college Capital Renewal projects total \$9.1 million. The allocation for community colleges is based on 100 percent of community college square footage and assumes that local funds will provide 25 percent of the cost of the projects supported with these grant funds.

Regular Capital

Recommendations for Regular Capital projects at public universities place priority on remodeling projects designed to upgrade instructional and instructional support areas. Included are funds to purchase equipment to complete major improvements to buildings at Eastern Illinois University, Northeastern Illinois University, and Southern Illinois University Carbondale. Major renovation projects are recommended for Illinois State University, Northern Illinois University, Western Illinois University, Southern Illinois University Carbondale, and the University of Illinois at Urbana-Champaign. Roof and window replacements and masonry repairs are recommended for the University of Illinois at Chicago, as well as roof replacements at Chicago State University. Recommendations are included for site improvements at Governors State University and for utility upgrades at Illinois State University and Eastern Illinois University. The Regular Capital recommendations include funds for planning for the major remodeling and expansion of the Science Laboratory Building at Southern Illinois University Edwardsville.

Funds are recommended to purchase equipment for a new convocation center at Chicago State University and the College of Business Building, Barsema Hall at Northern Illinois University. Planning funds for a new Education Building at Northeastern Illinois University and a convocation center at Western Illinois University are recommended. Finally, funding is

recommended to complete the construction and equip a classroom office building at the University of Illinois at Springfield.

The recommendations for Regular Capital projects for community colleges place priority on the construction of new facilities and additions to existing facilities to meet increasing enrollments and special programmatic purposes. Construction funds are recommended for new facilities for the College of Lake County, Rock Valley College, Lake Land College, William Rainey Harper College, Illinois Valley Community College, Heartland Community College, and Kaskaskia College. Recommendations include funds for additions at Lake Land College, Parkland College, and Rend Lake College. These projects eliminate or make permanent over 213,000 GSF of temporary space.

Projects to remodel buildings and upgrade utilities are included in the recommendations for Triton College, Joliet Junior College, Morton College, Sauk Valley College, William Rainey Harper College, and the College of DuPage. Funds to provide a new entrance to Elgin Community College are recommended.

The fiscal year 2003 recommendations include \$9.0 million to complete the construction and purchase equipment for the University Center of Lake County. Projects recommended for the Illinois Mathematics and Science Academy include the renovation and expansion of the east gymnasium to provide needed program space and the modernization and expansion of laboratories constructed in 1976.

Sections IX, X, and XI provide a description of each project recommended for funding in fiscal year 2003. The descriptions include an estimate of any associated increase in operations and maintenance costs related to the recommended projects.

Selection and Prioritization of Recommended Projects

The Illinois Commitment and the *Master Plan Policies for Illinois Higher Education* serve as guides in selecting projects to be included in the budget recommendations. This ensures that recommended projects are consistent with and advance state and institutional priorities. Once projects are selected for inclusion in the recommendations, a priority list is developed, indicating the order in which projects should be funded. Factors considered in developing this list include whether:

- a commitment for a project has been made through prior appropriation(s) or authorizations,
- the status of an ongoing project for which planning or construction funds have been appropriated necessitates that funding be provided to complete the project in a timely fashion,
- the project addresses an emergency infrastructure problem, e.g. problems caused by fire or tornado damage, construction defects, or compliance with life, health, and safety code requirements,
- the project received a high ranking on a public university governing board's priority list, the Illinois Community College Board's priority list of community college projects, or the Illinois Mathematics and Science Academy's priority list, and

- the location of the project on the Board of Higher Education's prior year's priority list to encourage multi-year, statewide planning through a "living priority" list. After a project is recommended to the Governor and General Assembly for funding, the Board endeavors to advance its position on the list until it is funded.

Table A-9 in the Appendix presents the fiscal year 2003 priority list, and includes information for each project concerning its priority placement on the fiscal year 2002 statewide priority list, its placement on the fiscal year 2003 institutional or agency priority list, and other comments concerning the reasons for a project's specific placement on the fiscal year 2003 priority list, including conflicting factors.

Consistent with policies that place emphasis on maintaining and protecting existing higher education facilities, funding for Capital Renewal projects is the first priority on the fiscal year 2003 capital list. The Capital Renewal allocation provides each community college and public university with resources to undertake minor infrastructure improvements and helps reduce the deferred maintenance backlog.

Table J
FISCAL YEAR 2003
IMPACT OF CAPITAL RECOMMENDATIONS ON FUTURE BUDGETS

(in thousands of dollars)					
Institution/Project	Prior Allocations	FY2003 Recommendation	Future Year	Nonstate Funds	Total
<u>Northeastern Illinois University</u> Education Building		\$ 3,779.3	\$ 44,782.1	\$	\$ 48,561.4
<u>Western Illinois University</u> Convocation Center		4,566.9	27,483.1		32,050.0
<u>Southern Illinois University at Carbondale</u> Morris Library Renovation and Addition Communications Building Renovation and Addition	\$ 1,918.9	25,690.0	2,121.8		29,730.7
	4,886.7	4,753.7	515.0	\$ 5,000.0	15,155.4
<u>Southern Illinois University at Edwardsville</u> Science Laboratory Building Renovation and Expansion	350.0	1,714.0	39,206.0 *		41,270.0
TOTAL	\$ 7,155.6	\$ 40,503.9	\$ 114,108.0	\$ 5,000.0	\$ 166,767.5

* Excludes a future allocation for equipment to be determined.

IX. PUBLIC UNIVERSITIES

CHICAGO STATE UNIVERSITY

Fiscal year 2003 capital budget recommendations for Chicago State University total \$8.0 million, including \$7.5 million for Regular Capital projects and \$483,100 for Capital Renewal projects. Table IX-1 provides a list of the projects the University requested for funding and identifies the projects and amounts recommended by the Board of Higher Education in fiscal year 2003. Table IX-1 also shows for each project the total estimated project cost, prior year funding, associated out-year costs, and the amount supported with local or private fund sources. Narrative descriptions of the projects recommended for funding in fiscal year 2003 follow.

Regular Capital

Convocation Center (Equipment, \$3,000,000)

This project provides for the purchase of moveable equipment to complete the construction of a 63,000-GSF convocation center. The center will provide an on-site facility in which to hold commencement exercises and convocations, will allow the university to interact with the community by hosting meetings that benefit the student body and the community at large, and will support the growth experienced in the arts programs. The center will house broadcasting, arts, music, speech, and theater programs. Equipment to be purchased includes office and classroom furniture; food service equipment; media, broadcasting, and teleconferencing equipment; performance lighting and controls; audio-visual equipment; storage shelving and cabinets; and other specialized items for the programs housed in the center. The total estimated cost of the project is \$28,000,000, including \$25,000,000 in prior year appropriations and allocations for planning and construction. The University estimates the annual cost to operate and maintain the center will be \$533,000.

Roof Replacements (Remodeling, \$4,500,000)

This project provides for replacing the deteriorated roofing systems of six buildings: Williams Science Building, Jacoby Dickens Physical Education Building, Cook Administration Building, Douglas Library Building, Education Building, and Business and Health Sciences Building. The roofing systems are original to the buildings that were constructed in the 1970s and have outlived their useful lives. The project involves removal of asbestos.

Capital Renewal

Public Restroom Facilities Upgrade (Remodeling, \$483,100)

This project provides for improvements to fixtures and the plumbing system to ensure the safety, efficiency, and appearance of facilities.

EASTERN ILLINOIS UNIVERSITY

Fiscal year 2003 capital budget recommendations for Eastern Illinois University total \$13.9 million, including \$13.1 million for Regular Capital projects and \$773,300 for Capital Renewal projects. Table IX-2 provides a list of the projects the University requested for funding and identifies the projects and amounts recommended by the Board of Higher Education in fiscal year 2003. Table IX-2 also shows for each project the total estimated project cost, prior year funding, associated out-year costs, and the amount supported with local or private fund sources. Narrative descriptions of the projects recommended for funding in fiscal year 2003 follow.

Regular Capital

Fine Arts Center Renovation and Expansion (Equipment, \$7,500,000)

This project provides for the purchase of moveable equipment to complete the rehabilitation and expansion of the Fine Arts Center. The completed 212,000-GSF facility will provide 138,000 NASF for classrooms and teaching laboratories, offices, and general and special use areas for the University's Fine Arts programs. Equipment needs include classroom and office furniture, moveable practice rooms, computers and networking equipment, and other specialized items for the programs to be housed in the facility. The total estimated cost of this project is \$53,833,600, including prior year appropriations totaling \$46,333,600 for planning, land acquisition, remodeling, and construction. The University estimates the annual cost to operate and maintain the center will be \$825,000.

Chilled Water Loop and Electrical Distribution System Upgrade (Utilities, \$5,600,000)

In 1995 the University initiated design of a chilled water loop to connect four buildings' air conditioning equipment to improve energy efficiency and reliability. Due to the project's success, the University installed extensions to the central loop to serve the west and north-central campus buildings and a loop to serve the south quad buildings. This project provides for extending the central chilled water loop south from Booth Library, under Garfield Avenue via the recently completed steam tunnel, connecting to the south quad loop. In addition, the project provides an extension to the north to provide hookups for the four north quad campus buildings. This project will join the existing north, central, and west loops with the south quad and north quad users, bringing to 21 the total number of buildings piped into the loop. This project will increase the reliability of cooling systems and will allow more efficient use of energy year-round.

This project also provides for replacing the campus electrical distribution system, including upgrade of the main campus substation. In 1995 the University experienced a major electrical outage resulting from problems with the local utility and distribution cabling. Since then, the University has experienced six additional failures on the high voltage distribution systems, forcing academic, residential, and administrative buildings to be out of service for extended periods. The most recent outage occurred on Christmas Eve 2000 resulting in damage to the mechanical systems in the Fine Arts Complex. The new system will serve the University approximately 50 years.

Capital Renewal

McAfee Gym Chiller and Electrical System Rehabilitation (Remodeling, \$350,000)

McAfee Gymnasium was constructed in 1937 and is listed on the National Register of Historic Places. Library Services is occupying this building during the renovation of Booth Library. The campus registration office, faculty offices, and classrooms also are housed in McAfee. The chiller in McAfee, installed in 1963, has outlived its useful life and parts are obsolete. The unit is positioned on the chilled water loop and will need to provide chilling capacity to support the Physical Science Building and other buildings downstream. Loss of this chiller would threaten the ability of the loop to provide adequate cooling capacity in strategic buildings. In addition, McAfee's main electrical service is original to the building and has been loaded to the maximum of the feeder capacity. Any additional required load may cause circuit overheating and tripping of protective relays and circuit breakers. This project provides for the installation of a new 200-ton chiller to ensure reliable cooling capacity and off-season loop cooling capability for the campus. To support the new chiller and upgrade electrical service capacity, new substation equipment and main feeders will be installed from the service manhole to the electrical vault.

Student Services Building Window Replacement (Remodeling, \$176,000)

The Student Services Building was constructed in 1928. The windows are wood frame, double-hung units with single-pane glazing, and are deteriorated. This project provides for installing aluminum frame, thermopane glazed windows that will complement the historic significance of the building.

Klehm Hall Chiller Rehabilitation (Remodeling, \$247,300)

Klehm Hall was constructed in 1966, and the absorption chiller is original to the building. It is beyond its economic and useful life and is inefficient. This project will provide for replacing the chiller with a more efficient absorption machine and for connecting the chiller with the campus south quad chilled water loop.

GOVERNORS STATE UNIVERSITY

Fiscal year 2003 capital budget recommendations for Governors State University total \$2.2 million, including \$1.9 million for Regular Capital projects and \$284,600 for Capital Renewal projects. Table IX-3 provides a list of the projects the University requested for funding and identifies the projects and amounts recommended by the Board of Higher Education in fiscal year 2003. Table IX-3 also shows for each project the total estimated project cost, prior year funding, associated out-year costs, and the amount supported with local or private fund sources. Narrative descriptions of the projects recommended for funding in fiscal year 2003 follow.

Regular Capital

Campus Roadway and Sidewalk Renovation (Site Improvements, \$1,902,900)

This project provides for improving and replacing roads, curbs, sewers, and sidewalks to address growth at the campus and the aging of infrastructure. The new Family Development Center/Charter School will be constructed along the southern corridor of the campus. A new southern entrance, joined to the main campus facility north of Dralle Road, will provide better access to the Family Development Center/Charter School for children coming from the Crete-Monee and University Park School Districts and will alleviate traffic congestion presently experienced on campus. The University expects to cooperate with the Village of University Park to create an overpass over the railroad tracks at the western edge of the campus to improve traffic flow, further reinforcing the need for a southern entrance to the campus. A traffic control signal will be installed at the intersection of University Drive and Stuenkel Road, and directional, regulatory, pedestrian control, and handicap signage will be provided as required.

Capital Renewal

Structural Concrete Repairs (Remodeling, \$57,300)

This project provides for the completion of improvements to correct structural concrete deterioration around the pool, main entrances, and fire escape towers. A total of \$192,700 was appropriated in fiscal year 2002 to begin to correct the deficiencies.

Campus Outbuilding Renovations (Remodeling, \$227,300)

This project provides for improvements to the Conference Center, Child Care Center, and Wagner House, including the upgrade of washrooms, remodeling to comply with the Americans with Disabilities Act, and waterproofing of masonry to eliminate leaks into the facilities. Wood siding will be repaired or replaced. The Conference Center roof will be replaced.

The Marek House, a residence constructed in 1970 and now used as a College of Arts and Sciences field station, will be renovated for use as an integrated laboratory. Improvements will include upgrades of the plumbing and interior and exterior lighting systems; installation of laboratory benches, cabinets, shelving, a greenhouse, and a T1 line with internal network; and new floor finishes.

Table IX-3

	Grand Total	\$ 2,402.9	\$ 2,210.2	\$ 192.7	-	-	\$ 2,187.5

ILLINOIS STATE UNIVERSITY

Fiscal year 2003 capital budget recommendations for Illinois State University total \$41.0 million, including \$39.5 million for Regular Capital projects and \$1.5 million for Capital Renewal projects. Table IX-4 provides a list of the projects the University requested for funding and identifies the projects and amounts recommended by the Board of Higher Education in fiscal year 2003. Table IX-4 also shows for each project the total estimated project cost, prior year funding, associated out-year costs, and the amount supported with local or private fund sources. Narrative descriptions of the projects recommended for funding in fiscal year 2003 follow.

Regular Capital

Life Safety Improvements – Stevenson and Turner Halls (Remodeling, \$21,500,000)

This project provides for remodeling of Stevenson Hall, which was constructed in 1968 and houses the College of Arts and Sciences, and Turner Hall, which was constructed in 1963 and houses the College of Applied Science and Technology. The replacement of fire alarm systems and improvements to electrical systems will provide code compliance, meet the requirements of the Americans with Disabilities Act, ensure compatibility with the town of Normal fire protection services, and ensure proper service to alarm and fire protection systems. The project also includes installation of a new control panel to communicate with the University's fire monitoring system, smoke detectors, heat detectors, horns, visuals, pull stations, door closures, new wiring, and proper exit lighting. Modifications will be made to provide heating, ventilating, and air conditioning shutdown and elevator-recall capability. Fire-stopping material will be installed around piping and conduit, sprinklers, and fire dampers where ductwork penetrates a firewall. The project also includes asbestos abatement.

Power Plant and Utility Distribution System Upgrade (Utilities, \$18,000,000)

This project will improve the operation of the University's power plant and its associated utility infrastructure systems. The power plant contains central boilers and chilled water production capability for the campus and has been in continuous service since its construction in 1925. The mechanical and water distribution systems that deliver steam and chilled and domestic water to University buildings are over thirty years old and have exceeded their expected useful life. Breaks or leaks in steam and water lines are frequent and cause disruption to instructional programs when they occur.

The centralized power plant contains four boilers and one steam absorption chilled water unit with more cooling capacity to be added as part of the Schroeder Hall remodeling project. This project provides for retrofitting or replacing one or more of the existing boilers to improve energy efficiency, for replacing and consolidating several independent chilled water systems, and for completing the central quad chilled water loop. Utility lines will be replaced and rerouted to better serve the changing demands of the campus. Refrigeration mechanics and pipe fitters will be relocated from the power plant to a more centralized area, and vacated space will be utilized to house auxiliary equipment such as generators, central air receivers, and heat recovery systems. A 10,000-GSF satellite steam and chilled water plant will be constructed to serve the west campus. Other improvements include the installation of back-up fuel burners to burn more than one type of fuel and the replacement or upgrade of plant auxiliary equipment to support campus growth and improvements.

Capital Renewal

Felmley Hall Mechanical Improvements (Remodeling, \$750,000)

Felmley Hall is undergoing a multi-phase renovation to accommodate new science-related academic departments and to meet code requirements. The Chemistry and Biology Departments have relocated from Felmley Hall to the Science Laboratory Building, and this project will complete the renovation of Felmley Hall to house the Departments of Geology, Geography, and Health Sciences. This project will provide for the completion of the upgrade of the mechanical systems, primarily the heating system. The total estimated cost of this phase of the project is \$1,100,000, including a prior allocation of \$350,000.

South Quad Utility Distribution Extension (Utilities, \$782,000)

This project will provide for the extension of utilities to serve the new College of Business facility. A primary utility loop around the Quad will be completed, improving service to all the buildings on the loop.

NORTHEASTERN ILLINOIS UNIVERSITY

Fiscal year 2003 capital budget recommendations for Northeastern Illinois University total \$8.1 million, including \$7.5 million for Regular Capital projects and \$575,500 for Capital Renewal projects. Table IX-5 provides a list of the projects the University requested for funding and identifies the projects and amounts recommended by the Board of Higher Education in fiscal year 2003. Table IX-5 also shows for each project the total estimated project cost, prior year funding, associated out-year costs, and the amount supported with local or private fund sources. Narrative descriptions of the projects recommended for funding in fiscal year 2003 follow.

Regular Capital

Buildings "A," "B," and "E" Remodeling (Equipment, \$3,740,000)

This project provides for the purchase of moveable equipment to complete the remodeling of Buildings "A," "B," and "E." The equipment includes classroom and office furniture, computer laboratory equipment and furniture, and general supportive equipment for the academic departments and support services housed in the space. The total estimated cost of the project is \$11,867,500, including \$8,127,500 appropriated for remodeling in fiscal year 2000.

Education Building (Planning, \$3,779,300)

This project provides for the construction of a 189,700-GSF Education Building to consolidate the University's teacher education programs in one centralized location. Currently, departments of the College of Education are located in various campus buildings. Offices, meeting rooms, classrooms, laboratories, clinics, and resource rooms are decentralized. The Chicago Teachers' Center, currently located in an off-campus leased facility, also will be relocated to the new Education Building. The new facility will house classrooms wired and equipped for new technologies and audio/video media, including distance education activities; clinics and laboratories for graduate and undergraduate students, as well as teachers returning for continuing education; a conference center; and a research and professional development center. It will accommodate specialized classrooms for Science Methods and Early Childhood and clinical areas for Special Education, Reading, and Counselor Education. It will be constructed adjacent to the Physical Education and Science buildings to provide synergy between students in the College of Education and the College of Arts and Sciences.

The project will provide 118,270 NASF, including 24,000 NASF for classrooms, 17,185 NASF for laboratories, 30,065 NASF for offices, and 47,020 NASF for general use and support space. Campus utilities and mechanical systems, including the heating, ventilation, air conditioning, water loop, sewer system, stormwater detention system, and electrical system, will be extended and expanded to support the new building. A service drive will be provided from the east at St. Louis Avenue. The University estimates it will save approximately \$263,000 in annual lease costs when the Chicago Teachers' Center relocates to the main campus. The University estimates the annual cost to operate and maintain the building will be \$1,451,800. The total estimated cost of the project is \$48,561,400, including a future allocation of \$44,782,100 for construction, site improvements, and utilities. The estimated cost excludes a future allocation for moveable equipment.

Capital Renewal

Science Building Laboratories Modernization (Remodeling, \$196,600)

This project will retrofit 40 laboratories and support areas in the Science Building. Laboratory space will be reconfigured to meet current program requirements, including casework and utilities, and underutilized laboratory space will be converted to general purpose classrooms. The total estimated cost of this project is \$970,600, including a prior allocation of \$774,000.

Campus Elevator Modernization (Remodeling, \$378,900)

This project provides for the replacement of two 37-year-old elevators in the "E" Building. The elevators are unreliable, and parts are difficult to find. The project also provides for the overhaul of four 20-year-old elevators in the Library that require reconditioning to ensure reliable service.

NORTHERN ILLINOIS UNIVERSITY

Fiscal year 2003 capital budget recommendations for Northern Illinois University total \$23.5 million, including \$21.7 million for Regular Capital projects and \$1.7 million for Capital Renewal projects. Table IX-6 provides a list of the projects the University requested for funding and identifies the projects and amounts recommended by the Board of Higher Education in fiscal year 2003. Table IX-6 also shows for each project the total estimated project cost, prior year funding, associated out-year costs, and the amount supported with local or private fund sources. Narrative descriptions of the projects recommended for funding in fiscal year 2003 follow.

Regular Capital

Stevens Building Renovation and Addition (Remodeling, \$16,809,700)

This project provides for the renovation and expansion of the 67,000-GSF Stevens Building that was constructed in 1959 to house the Art, Music, and Theatre Programs. The Art and Music Programs subsequently moved to new facilities with space adequate to meet their needs. Improvements provided by this project will accommodate the needs of the Departments of Anthropology and Theater Arts and the computer laboratories currently housed in the facility, and will provide upgrades necessary for efficient operation of the facility. Partitions and walls will be demolished and the space will be reconfigured; mechanical, electrical, heating, ventilating, air conditioning, and lighting systems will be upgraded; windows, ceilings, and floor tile will be replaced; the exterior will be tuckpointed; and new interior finishes will be provided. Improvements will ensure compliance with Americans with Disabilities Act, and asbestos will be abated. A 33,080-GSF addition to the east side of the facility will provide 17,956 NASF for a black box theatre and support space for the Department of Theater Arts. Moveable equipment will be provided for the new addition. The University estimates the annual cost to operate and maintain the expanded facility will be \$170,400.

College of Business Building, Barsema Hall (Equipment, \$4,930,000)

This project provides for the purchase of moveable equipment for the new 144,400-GSF Barsema Hall under construction at the northeast quadrant of the campus. The College of Business is located currently in McMurtry Hall and Wirtz Hall. The aging infrastructure of these buildings does not support the high levels of technology needed to support the instruction, communication, and research of the College of Business. Barsema Hall will provide a state-of-the-art facility to house all faculty, instructional, and administrative functions in one building. Equipment to be purchased includes office and classroom furnishings, computers and networking equipment, audio visual equipment, workstations, and other specialized items to meet the needs of the programs housed in the facility. The University estimates the annual cost to operate and maintain the building will be \$864,000. The total estimated cost of the project is \$24,930,000, including a \$20,000,000 gift to the University.

Capital Renewal

Gilbert Hall Americans with Disabilities Act Compliance (Remodeling, \$435,300)

Gilbert Hall was constructed as a four-story residence hall. In 1998, the facility was converted to instructional use, and the College of Health and Human Sciences moved into the facility. This project will provide modifications to restrooms, the replacement of water coolers,

and the installation of room signage and ramps to comply with provisions of the Americans with Disabilities Act.

Smart Classrooms (Remodeling, \$751,200)

This project provides for reconfiguring space and improving infrastructure to create “smart classrooms.” Raceways for electrical wiring will be installed, and lighting, heating, ventilation, and air conditioning systems will be upgraded. Security measures will be addressed to ensure equipment is protected, and accessibility will be improved.

Social Science Research Institute Air Conditioning Replacement (Remodeling, \$248,900)

The facility housing the Social Science Research Institute was constructed in the 1920s with a central boiler heating system and no air conditioning. Since the University occupied the building in the 1980s, stand-alone and window air conditioning units have been used. These units are costly to operate and have exceeded their useful life. This project provides for the installation of central air conditioning for more reliable and efficient cooling. Window air conditioners will be removed, and panels will be installed to seal the bottom section of each window.

Campus Signage and Landscaping Phase I (Site Improvements, \$303,100)

This project will provide for the design, fabrication, and installation of vehicular and pedestrian directional signs, campus orientation maps, student posting areas, vehicular and building entry markers, building entry plaques and architectural letters, parking and regulatory signs, and Americans with Disabilities Act signage.

WESTERN ILLINOIS UNIVERSITY

Fiscal year 2003 capital budget recommendations for Western Illinois University total \$13.8 million, including \$12.6 million for Regular Capital projects and \$1.2 million for Capital Renewal projects. Table IX-7 provides a list of the projects the University requested for funding and identifies the projects and amounts recommended by the Board of Higher Education in fiscal year 2003. Table IX-7 also shows for each project the total estimated project cost, prior year funding, associated out-year costs, and the amount supported with local or private fund sources. Narrative descriptions of the projects recommended for funding in fiscal year 2003 follow.

Regular Capital

Convocation Center (Planning, \$4,566,900)

Currently the University's Music and Theater Departments use Hainline Theater and Simpkins Recital Hall for over 200 events annually. Western Hall, a multi-purpose facility, is used for musical performances with larger audiences. The University and community do not have a facility that provides the optimal visual and acoustical quality and support space for the variety of cultural and civic events scheduled for presentation on the campus.

This project provides for planning a 65,000-GSF convocation center to provide 56,520 NASF for student convocation, College of Fine Arts and Communications recitals, Bureau of Cultural Affairs performing arts series events, lectures, graduation ceremonies, and local arts and civic functions. The center will include a 1,600-seat performance auditorium with a stage and full rigging; a loading dock with adjacent staging; ticket, projection, recording, and sound booths; scene shop; two green rooms; main gallery and lobby; restrooms; and janitorial space. The University estimates the annual cost to operate and maintain the center will be \$910,000. The total estimated cost of the project is \$32,050,000, including future allocations totaling \$27,483,100.

Life Safety Improvements, Phase I (Remodeling, \$8,000,000)

This project provides for the upgrade of mechanical, electrical, and fire alarm systems to comply with life safety codes for buildings constructed from 1900 through 1978. These buildings include Sherman, Simpkins, Tillman, Sallee, Browne, Morgan, Stipes, Waggoner, Currans, Brophy, and Western Halls and the Physical Plant. They were identified in a Life Safety Study completed during the fall 1995, and comprise approximately two million square feet of space. The total estimated cost to upgrade all buildings is \$17,235,000, including a future allocation of \$9,235,000.

Capital Renewal

Heating Plant Upgrade (Remodeling, \$1,188,300)

This project provides for improvements to the heating plant to comply with United States Environmental Protection Agency (USEPA) regulations. Coal cannot be burned without proper stack opacity monitoring and particulate removal. The current opacity monitor is becoming obsolete. A new monitor will require changes in the coal flue gas breeching design to meet USEPA updated requirements. A pre-heater and additional insulation for the baghouse will

eliminate sulfuric acid condensation when the two coal boilers are off line. Emergency generator switchgear installed in 1962 will be replaced.

SOUTHERN ILLINOIS UNIVERSITY CARBONDALE

Fiscal year 2003 capital budget recommendations for Southern Illinois University Carbondale total \$33.9 million, including \$31.4 million for Regular Capital projects and \$2.4 million for Capital Renewal projects. Table IX-8 provides a list of the projects the University requested for funding and identifies the projects and amounts recommended by the Board of Higher Education in fiscal year 2003. Table IX-8 also shows for each project the total estimated project cost, prior year funding, associated out-year costs, and the amount supported with local or private fund sources. Narrative descriptions of the projects recommended for funding in fiscal year 2003 follow.

Regular Capital

Morris Library Renovation and Addition (Remodeling, \$25,690,000)

This project provides for improvements to the existing structure of Morris Library, completed in 1956 and 1964, including upgrade of mechanical systems; installation of building automation systems; and replacement of fire alarms, the electrical wiring system including the primary electrical service, and carpet. Climate control will be improved to achieve year round comfortable temperature. A 50,000-GSF addition to the library will be constructed to support distance learning, teleconferencing, and the use of technology in teaching and research. The space will be the center for instruction in library use, for circulating library materials, and for 24-hour study. The total estimated project cost is \$29,730,700, including a fiscal year 2002 appropriation of \$1,918,900 for planning and equipment and a future allocation of \$2,121,800 for equipment. The University estimates the annual cost to operate and maintain the addition will be \$360,000.

Communications Building Renovation and Addition (Remodeling, \$4,753,700)

Federal Communications Commission regulations mandate public television stations to broadcast by digital signal by May 2003 and to broadcast simultaneously both digital and analog signals until 2006. This project provides for construction of a 13,000-GSF addition to the Communications Building to house the equipment necessary to convert WSIU-TV and WUSI-TV (Olney) from an analog signal to a digital signal. The project also involves remodeling 7,000 NASF in the basement of the north wing of the Communications Building. The Cinema and Photography Department presently uses this area for editing, viewing, and studio instructional space. The project includes reconfiguring space to provide additional editing and viewing rooms and improvements to acoustics, lighting, and heating, ventilating, and air conditioning systems. The total estimated cost of this project is \$15,155,400, including the following for equipment: prior appropriations of state funds totaling \$4,886,664 in fiscal years 2000, 2001, and 2002; a future allocation of \$515,000 from state funds, and \$5,000,000 in non-state funds. The University estimates the annual cost to operate and maintain the addition will be \$93,600.

Altgeld Hall and Old Baptist Foundation Building Renovation and Addition (Equipment, \$1,000,000)

This project provides for the purchase of moveable equipment to complete the renovation and expansion of Altgeld Hall, a 100-year old facility, and the Old Baptist Foundation Building, acquired by the University in 1964. The School of Music occupies both buildings.

Equipment to be purchased includes office and classroom furniture, sound and recording studio equipment, music library storage cabinets, chairs and stands for performance halls, computers and furnishings for the computer laboratory, and other specialized equipment for the music program. The total estimated cost of this project is \$12,054,300, including prior appropriations totaling \$11,054,300 in fiscal years 1997 and 2001. The University estimates the annual costs to operate and maintain the 20,000-GSF addition will be \$135,600. The fiscal year 2003 budget recommendation includes \$70,700 for the first six months of the operating and maintenance funding.

Capital Renewal

Roof Replacements (Remodeling, \$1,000,000)

This project provides for the replacement of roofs on Quigley Hall, Life Science II fourth floor, and Agriculture C-Wing. The roofs are over 15 years old and will be replaced with single-ply roof systems that will include tapered insulation underlayment to prevent water ponding.

Steam Tunnel Structural Repairs (Utilities, \$500,000)

The campus utilizes a network of underground reinforced concrete tunnels for its utility distribution to most of the central campus buildings. This project provides for repairs to a 50-year old, 1,000-foot long section of tunnel running through the original campus area. This is one of the oldest sections of tunnel, and the tunnel top has begun to collapse in some areas, causing the steam line anchors to break loose and creating a hazard.

Fire Alarm Systems Replacement (Remodeling, \$645,100)

This project provides for the upgrade of the fire alarm system at the Medical Instructional Facility in Springfield. The current system was installed in 1975. The new system will include heat sensors, smoke sensors, pull stations, audible horns, strobe lights, duct sensors, remote annunciator control panels, and code transmitters. Electrical wiring will be upgraded as necessary to provide the current for an audible/visual fire alarm system. With this upgrade, the system will be in compliance with the current National Fire Protection Association code and with the provisions of the Americans with Disabilities Act.

Neckers Building Laboratory Renovations (Remodeling, \$292,400)

This project provides for the renovation of four biochemistry research laboratories on the second floor of the Neckers Building. The laboratories, originally constructed as chemistry teaching labs, are inefficient as research laboratories and no longer meet fire and safety standards. The space occupied by the four large laboratories will be reconfigured to provide eight smaller, more efficient units. New interior finishes and lighting fixtures will be provided. Improvements will include upgrade of the electrical and heating, ventilating, and air conditioning systems. Safety showers and eyewash stations will be modified for the physically challenged. One fume hood exhaust system and ventilation system will be provided each laboratory. Casework will be replaced and connected to water, gas, air, and vacuum lines. Storage for flammables and hazardous chemicals will be provided.

SOUTHERN ILLINOIS UNIVERSITY EDWARDSVILLE

Fiscal year 2003 capital budget recommendations for Southern Illinois University Edwardsville total \$2.9 million, including \$1.7 million for Regular Capital projects and \$1.1 million for Capital Renewal projects. Table IX-9 provides a list of the projects the University requested for funding and identifies the projects and amounts recommended by the Board of Higher Education in fiscal year 2003. Table IX-9 also shows for each project the total estimated project cost, prior year funding, associated out-year costs, and the amount supported with local or private fund sources. Narrative descriptions of the projects recommended for funding in fiscal year 2003 follow.

Regular Capital

Science Laboratory Building Renovation and Expansion (Planning, \$1,714,000)

The Science Laboratory Building, constructed in 1966, currently houses classrooms, instructional laboratories, and research laboratories for the Departments of Biological Sciences, Chemistry, Mathematics and Statistics, and Physics, and the Office of Science and Mathematics Education. The building also housed the Departments of Civil, Industrial, and Mechanical Engineering until the new engineering facility opened in 2000. Program growth in the sciences and engineering, along with the recognition of the importance of laboratory experiences for general education, placed increasing demands on the aging facility, and piecemeal modifications to the building to accommodate programmatic changes taxed further the building's systems. The move of the engineering programs to the new facility freed up 16,000 GSF of laboratory and classroom space for expanding programs in the life and physical sciences and mathematics. This provides an opportunity to reconfigure the existing facility to improve efficiency and to provide additional research space, modern instructional laboratories and classrooms, and a healthier working environment for students and faculty.

This project provides for planning the construction of a 28,000-GSF chemistry wing to the Science Building, the renovation of 75,000 GSF in the laboratory wing, and the remodeling of approximately 4,700 GSF of office space for a new computer cluster. A portion of the current office wing will be converted to additional classroom space. Upgrades of the heating, ventilating, air conditioning, mechanical, plumbing, and electrical systems are included. Americans with Disabilities Act compliance will be addressed, as well as fire safety and safe storage and disposal of chemicals. Improvements to the existing auditorium wing will include replacing approximately 12,000 square feet of single-pane glass with energy efficient glass and replacing the upper auditorium with smaller classrooms. Fume hoods in instructional labs will be replaced, as needed, with variable volume airflow hoods to reduce energy consumption and to provide additional safety for students and staff. Specialized classrooms will be developed for the Department of Mathematics and Statistics and the Office of Science and Mathematics Education, and each laboratory science unit will have a dedicated laboratory. The total estimated cost of the project is \$41,270,000, including a fiscal year 1999 appropriation of \$350,000 for planning and a future allocation of \$39,206,000 for construction. The estimated cost excludes an allocation for equipment. The University estimates the annual cost to operate and maintain the chemistry wing will be \$200,000.

Capital Renewal

Infrastructure Repairs, Phase III (Remodeling, \$737,900)

The heating, ventilation, and air conditioning systems in Peck, Alumni, and Founders Halls are reaching the end of their design life, reliability is decreasing, and repair parts are becoming increasingly difficult to obtain. This project provides for upgrading the systems.

Infrastructure Repairs, Phase IV (Remodeling, \$406,800)

This project provides for upgrading the electrical distribution systems in Dunham and Rendleman Halls. Increased usage of computers and other electronic equipment in the past ten years has increased the demand for electrical power. At the same time these systems are reaching the end of their design life, reliability is decreasing, and repair parts are becoming difficult to obtain.

UNIVERSITY OF ILLINOIS AT CHICAGO

Fiscal year 2003 capital budget recommendations for the University of Illinois at Chicago total \$20.2 million, including \$16.0 million for Regular Capital projects and \$4.2 million for Capital Renewal projects. Table IX-10 provides a list of the projects the University requested for funding and identifies the projects and amounts recommended by the Board of Higher Education in fiscal year 2003. Table IX-10 also shows for each project the total estimated project cost, prior year funding, associated out-year costs, and the amount supported with local or private fund sources. Narrative descriptions of the projects recommended for funding in fiscal year 2003 follow.

Regular Capital

Roof and Window Replacement and Masonry Repairs (Remodeling, \$16,000,000)

This project provides for replacing approximately 212,000 square feet of roofs, repairing 60,000 square feet of masonry, and replacing or repairing 27,000 square feet of curtain walls and windows. Included in the roofs to be replaced are those on the Behavioral Sciences Building, Services Building, Easter Seal Building, Art and Architecture, Associated Health Profession Sciences, Administrative Office Building, and Paulina Street Building. The roof and skylights of Science and Engineering South will be replaced. All the roofs are over 30 years old and are leaking.

The masonry and windows of College of Medicine West Tower and College of Medicine West are over 60 years old and are in need of repair or replacement to prevent further distress of the masonry and to improve energy efficiency. A portion of the windows of the 60-year-old Associated Health Profession Sciences Building and the Physical Education Building are leaking or are cracked and will be replaced with energy efficient windows.

The curtain wall of the Illinois Institute for the Developmentally Disabled building is leaking and will be replaced with a new curtain wall with low-e reflective glass and a moisture drainage system. Included in the project are replacement of the roof and roof drains and installation of energy efficient windows.

University Hall and Science and Engineering Offices were constructed in the 1960s. The structural frame of these buildings consists of exposed, poured in-place, reinforced concrete columns; shear walls; and spandrel beams. The concrete is deteriorating, and the steel is corroding. Pre-cast window walls of these buildings are recessed three to six feet, creating exterior galleries. The waterproofing membranes of these exterior galleries are deteriorating, allowing water to infiltrate the building. Exterior improvements and waterproofing are necessary to protect the interior of the buildings and to ensure the safety of their occupants.

Capital Renewal

Medical Sciences Building, Research Resource Center Remodeling, Phase II (Remodeling, \$1,000,000)

Infrastructure improvements and remodeling of this facility were initiated in Phase I of the project funded in fiscal year 2002. This phase includes reconfiguring space, asbestos abatement, structural repair, and upgrade of the ventilating, air conditioning, plumbing,

electrical, lighting, telecommunications, and safety systems. New casework, counters, cabinets, shelving, equipment, and wall, floor, and ceiling finishes will be provided as needed.

Behavioral Sciences Building Deck Restoration (Remodeling, \$965,000)

The Behavioral Sciences Building, a 32-year-old structure, has several granite decks that were installed over a built-up waterproofing membrane. The waterproofing system has failed, allowing water to leak into the building and damage interior exposed concrete, masonry, and finishes. This project provides for replacing the waterproofing membrane. Insulation and roof drains also will be replaced, and the masonry parapet wall will be repaired.

Clinical Sciences North Window Replacement and Masonry Repairs (Remodeling, \$939,000)

Clinical Sciences North is over 80 years old. The original metal frame and sash, single-pane windows are deteriorated, their hardware is obsolete, and they are inefficient. Masonry joints are exhibiting signs of washout. This project provides for replacing the windows and the limestone moldings and tuckpointing the masonry for the north façade of the east half of the building. Improvements will make the building weather-tight and comfortable for occupants.

School of Public Health and Psychiatric Institute Window Replacement (Remodeling \$946,000)

The School of Public Health and Psychiatric Institute is over 40 years old. This project provides for the replacement of windows, screens, and window treatments and the associated repairs to walls. Replacement parts for the existing windows are unavailable, and excessive air infiltration is damaging interior finishes.

Science and Engineering Laboratories, Bioengineering Laboratory Rehabilitation (Remodeling, \$315,900)

This project provides for the remodeling of approximately 2,650 GSF of laboratory space. Improvements will include reconfiguring the space and replacing casework, counters, and cabinets as needed. Laboratory air, gas service, and vacuum piping and fittings will be upgraded. Eyewash fixtures will be installed. Heating, ventilation, air conditioning, and lighting systems will be improved. Electrical power will be provided to new casework and equipment. Telecommunication distribution and outlets for computers and data equipment will be provided. Interior finishes will be upgraded and signage provided.

UNIVERSITY OF ILLINOIS AT SPRINGFIELD

Fiscal year 2003 capital budget recommendations for the University of Illinois at Springfield total \$15.3 million, including \$15.0 million for Regular Capital projects and \$343,700 for Capital Renewal projects. Table IX-11 provides a list of the projects the University requested for funding and identifies the projects and amounts recommended by the Board of Higher Education in fiscal year 2003. Table IX-11 also shows for each project the total estimated project cost, prior year funding, associated out-year costs, and the amount supported with local or private fund sources. Narrative descriptions of the projects recommended for funding in fiscal year 2003 follow.

Regular Capital

Classroom Office Building (Buildings/Equipment, \$15,000,000)

This new facility will serve to further consolidate academic programs into permanent buildings in the central core of the campus, to provide "smart" classrooms, to relocate student service operations into the center of campus, and to provide needed classrooms to meet current and projected needs. The academic programs to be relocated are housed currently in pre-engineered metal buildings on the east side of campus and on the third and fourth levels of Brookens Library. Student services departments currently are housed in metal Building "F." The new classrooms are needed to replace existing classrooms in Brookens Library that will be converted to space for book stacks to house the library's expanded book collection. Upon completion of the building, vacated space in temporary buildings will be remodeled for support services.

This 126,900-GSF classroom and office facility will provide 82,480 NASF, including 23,400 NASF for classrooms; 13,400 NASF for laboratories; 32,690 NASF for office, conference rooms, and support services; 10,590 NASF for student services; and 2,400 NASF for general use facilities. The total estimated cost of the project is \$31,300,000 including appropriations totaling \$16,300,000 for planning and initial construction in fiscal years 2001 and 2002. The University estimates the annual cost to operate and maintain the facility will be \$990,000.

Capital Renewal

HVAC Rooftop Units Replacement (Remodeling, \$133,700)

Several heating, ventilating, and air conditioning roof top units on buildings on the east side of campus are at or near the end of their useful lives. This request provides for replacing 16 units ranging from three tons to 7.5 tons of cooling capacity. Completion of this project will ensure reliable heating and cooling and lower maintenance and repair costs for the buildings.

Career Services Center Renovation (Remodeling, \$50,000)

The Career Services Center moved into the Student Services Building in 1995. This project will provide for reconfiguring the space to improve the Center's efficiency. Other improvements include upgrade of the lighting and new carpet and wall finishes. Video and audio wiring, an electronic screen, an in-house sound system, and soundproofing will be provided for interview rooms.

Variable Speed Drive for Air Handling Unit (Remodeling, \$80,000)

This project provides for the installation of an energy efficient variable speed drive on the air handling unit that services the cafeteria and dining areas in the Public Affairs Center. Variable speed drives provide two to three year paybacks and a more comfortable environment with constant air circulation. Air handling units that service the Center's office and conference center areas already utilize variable speed drives.

High Efficiency Lighting Retrofit (Remodeling, \$80,000)

This project provides for retrofitting selected light fixtures with T-8 lamps and electronic ballasts to provide higher quality light and to use less energy. This project will upgrade lighting fixtures in library stack areas and classrooms.

UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

Fiscal year 2003 capital budget recommendations for the University of Illinois at Urbana-Champaign total \$52.2 million, including \$46.0 million for Regular Capital projects and \$6.2 million for Capital Renewal projects. Table IX-12 provides a list of the projects the University requested for funding and identifies the projects and amounts recommended by the Board of Higher Education in fiscal year 2003. Table IX-12 also shows for each project the total estimated project cost, prior year funding, associated out-year costs, and the amount supported with local or private fund sources. Narrative descriptions of the projects recommended for funding in fiscal year 2003 follow.

Regular Capital

Lincoln Hall Remodeling (Remodeling, \$46,000,000)

Lincoln Hall was constructed in 1911 and has had no major improvements since the west half and theater were added in 1930. With the completion of Spurlock Museum of World Cultures, nearly all the fourth floor will be vacated and available for surge space for a major remodeling of the building. Lincoln Hall houses the following programs and offices: Political Science, Sociology, Speech and Communications, the Dean of Liberal Arts and Sciences, Admission and Records for Liberal Arts and Sciences, and student computer laboratories.

The project will include the reconfiguration of space with as much instructional space as possible concentrated on the first two floors and offices on the upper two floors. Areas for teaching assistants will be located on the fourth floor. With the reconfiguration, classrooms of various sizes will be provided to meet the needs of academic programs. The backstage area of the theater, which has not been used for 25 years since the relocation of the Theater Department to the Krannert Center for the Performing Arts, will be eliminated, freeing up space on all floors. This will allow two classrooms to be placed on the first floor, with a double-loaded corridor on the west end of the second, third, and fourth floors to make more efficient use of existing outmoded space. Other improvements, in addition to the reconfiguration of space, will include upgrading the electrical, lighting, heating, ventilating, air conditioning, and networking systems. New flooring, ceilings, and wall finishes will be provided. Improvements to address code deficiencies will also be addressed.

Capital Renewal

Education Building Remodeling (Remodeling, \$600,000)

The College of Education's goal is to create space that will allow for group and individual instruction and for research in educational technology. Improvements include new walls, ceiling and flooring finishes; new lighting; enhanced power, networking, computer projection, and teleconferencing capabilities; built-in storage; and moveable equipment.

Main Library Remodeling (Remodeling, \$800,000)

This project provides for remodeling departmental libraries, primarily on the second and fourth floors of the main library. Space will be reconfigured, and computer and electrical wiring and lighting will be improved to respond to new technological demands. The improvements will

allow the library to deliver information by both traditional and electronic formats more effectively to students and faculty.

Medical Sciences Building Instructional Laboratories Renovation (Remodeling, \$1,055,400)

The Medical Sciences Building was designed in the early 1970s. This project will reconfigure approximately 6,000-NASF of space for laboratories for histology, microbiology, neuroscience, and immunology to accommodate changes in the curriculum and will make improvements to respond to the increased use of computer technology in instruction. The new layout will provide flexibility and multipurpose use in all the laboratories, lecture, and seminar space. Improvements include new walls, ceiling and flooring finishes; new lighting; enhanced power and networking capabilities; built-in storage; and moveable equipment.

Boneyard Creek Flood Control (Site Improvements, \$180,000)

This project provides for the completion of storm water drainage improvements in the north campus area. Drainage improvements along the Boneyard Creek from Wright Street to Lincoln Avenue include lowering the flow line of the creek, removing barriers to flow, and limited water retention. This portion of the project is part of the larger solution, developed among the University and the cities of Champaign and Urbana, which also included relocation of utilities and replacement of bridges at Mathews, Goodwin, and Gregory Avenues.

Metallurgy and Mining Building Roof Replacement (Remodeling, \$520,000)

The existing roof on the Metallurgy and Mining Building was installed in 1908, and has had only minor repairs and maintenance. The slate has exceeded its life expectancy, and the waterproofing felt has deteriorated with age and is no longer an effective moisture barrier. This project provides for the replacement of approximately 13,000 square feet of slate and 900 square feet of copper roofing materials. Copper gutters and downspouts also will be replaced. The University will cooperate with the Illinois Historic Preservation Agency to ensure modifications to skylights maintain the historical integrity of the building.

Roger Adams Laboratory HVAC Improvements (Planning, \$200,000)

This project provides for planning the upgrade of the heating, ventilating, and air conditioning service for the Laboratory. Various heating, ventilating, and air conditioning components have been installed through the years to resolve specific, not overall needs. Inadequate filtration has caused the accumulation of dust and mold particles in the supply ductwork of the chemistry laboratory and is affecting sensitive research instruments in the building. Air handling units will be upgraded to improve efficiency.

Mumford, Bevier, and Turner Halls Elevator Improvements (Remodeling, \$500,000)

This project provides for the renovation of elevators in Mumford, Bevier, and Turner Halls. Replacement parts for the aged elevators are becoming expensive and difficult to locate. Elevator components, including the gear traction drive machines, controls, hall doors, and cabs, will be replaced. Accessibility will be improved.

Gregory Drive Renovation (Site Improvements, \$400,000)

Gregory Drive from Oak Street to First Street is an oil and chip road with cinder base. It is in poor condition. This project provides for an upgrade of storm sewers, concrete curb, gutters, and the road, including ten inches of concrete to handle the high volume of bus traffic.

Noyes Laboratory HVAC Improvements (Planning, \$200,000)

This project provides for planning the upgrade of the heating, ventilating, and air conditioning service for the 100-year-old laboratory. Various heating, ventilating, and air conditioning components have been installed through the years to resolve specific, not overall needs. Inadequate filtration has caused the accumulation of dust and mold particles in the supply ductwork. Exhaust and fume hood systems will be upgraded to improve ventilation and pressurization.

Fire Alarm Upgrade (Remodeling, \$350,000)

This project provides fire safety improvements for Altgeld Hall. Improvements include the installation of a main sensing panel and the replacement and addition of detectors.

Krannert Center for the Performing Arts Accessibility Upgrade (Remodeling, \$620,000)

A master plan to evaluate bringing the Krannert Center into compliance with current accessibility requirements and removing barriers to persons with disabilities is being developed. The plan will examine alternative solutions to providing an accessible entry to the building from the sidewalk level, remodeling the ticket office to better serve persons with disabilities, and remodeling the lobby restrooms to improve accessibility. The plan also will identify accessible routes throughout the building and in individual theaters, in addition to providing a design for interior directional signage to assist patrons and workers. This project provides for remodeling needed to achieve accessibility.

Music Building Instructional Laboratories Renovation (Remodeling, \$500,000)

School of Music courses may require either instructional use of computers or independent lab work by the students. This project will enlarge the current instructional lab and create another lab, both dedicated to computer-based instruction. Improvements will include all new room finishes; heating, ventilating, air conditioning, lighting, voice/data, and electrical systems upgrades; and new computer carrels.

Horticulture Field Laboratory Roof Replacement (Remodeling, \$300,000)

The existing slate roof and dormers on the Horticulture Field Laboratory have failed. The felt paper under the slate was installed in 1923 and has deteriorated. This project provides for replacing the existing roof systems and repairing the dormers.

X. COMMUNITY COLLEGES

Fiscal year 2003 capital budget recommendations for the Illinois community college system total \$238.8 million, including \$179.7 million for Regular Capital projects, \$9.1 million for Capital Renewal projects, and \$50.0 million for the second year of the five-year, \$250.0 million Enhanced Construction Program. Table X-1 provides a list of the projects the Illinois Community College Board requested for funding and identifies the projects and amounts recommended by the Board of Higher Education in fiscal year 2003. Table X-1 also shows for each project the total estimated project cost, prior year funding, associated out-year costs, and the amount supported with local or private fund sources. Narrative descriptions of the projects recommended for funding in fiscal year 2003 follow.

The Public Community College Act (110 ILCA 805/5-9) requires a community college district to finance at least 25 percent of a state-funded capital project's cost with the state providing 75 percent. Narrative descriptions of the projects identify both the state and local shares. In September 1987, the Illinois Community College Board certified \$28.5 million in eligible credits to be applied toward the statutorily required 25 percent local funding share of a state-funded capital project. These credits represented amounts expended previously by community colleges from local funds for capital projects. At that time the Community College Board also discontinued the practice of approving locally funded projects for future state reimbursement credit. Approximately \$11.7 million of the certified credits currently remain.

Regular Capital

Lake Land College: Student Services Building Addition (Buildings, \$6,721,600)

This project provides for constructing a 60,000-GSF, multi-story addition to the Student Services Building to meet the demands of a growing student population and to unite student services under one roof. Major functions to be housed in the addition include counseling, student billing, career planning and placement, the student assembly room, and the bookstore. Heating, ventilation, air conditioning, electrical, and plumbing systems will be extended and improved to meet the needs of the new facility. Site improvements, including 300 additional parking spaces and sidewalks, will be provided. Included are 4,700 NASF for offices, 9,300 NASF for study and library services, 20,000 NASF for general use, and 8,000 NASF for support use. This project will replace approximately 1,572 GSF of temporary space. The total estimated cost of the project is \$8,962,100, including \$6,721,600 in state funds and \$2,240,500 in local funds.

Triton College: Technology Building Rehabilitation (Remodeling, \$7,435,000)

This project provides for rehabilitation of the 49,200-GSF Technology Building to address deficiencies caused by the expansive nature of fill material used when the building was constructed. The project will correct moisture penetration and problems with floors, walls, utilities, doors, and windows. The total estimated cost of the project is \$9,913,000, including \$7,435,000 in state funds and \$2,478,000 in local funds.

Joliet Junior College: Utilities Renovation (Utilities, \$3,160,500)

The Joliet Junior College campus was constructed in the early 1970s, and its utility systems need major improvements. This project provides for the construction of approximately 1,600 linear feet of reinforced concrete underground tunnel to house steam and condensate piping, a primary chilled water supply and return loop, and an electrical distribution system and to provide pathways for future communications and safety systems conduits. Four 25-year old chillers will be replaced and the water distribution loop will be reconfigured to provide efficiencies. The total estimated cost of the project is \$4,214,000, including \$3,160,500 in state funds and \$1,053,500 in local funds.

Morton College: Building Structural Repair (Remodeling, \$3,951,700)

The Morton College campus was constructed in the mid-1970s. This project provides for the repair of six buildings to eliminate wall, window, and door leaks. Included are tuckpointing; replacing doors and windows; replacing lintels; installing flashing; installing and repairing control joints; and replacing copings, deteriorated bricks, and sill flashing. The total estimated cost of the project is \$5,166,000, including \$3,951,700 in state funds and \$1,214,300 in local funds. The local funds share reflects eligible credits of \$77,200.

Rock Valley College: Arts Instructional Center (Buildings, \$23,816,000)

This project provides for the construction of a 113,526-GSF facility for the music, visual arts, and drama programs. Existing college facilities are inadequate to accommodate enrollment growth and the demand for program expansion in the instructional arts programs. Music programs are housed in buildings throughout the campus, and the variety and frequency of course offerings cannot meet demand. Visual arts programs lack the facilities for their special needs for space, lighting, and ventilation, disposal of chemicals and paints, and storage. New areas for computerized art, ceramics, sculpture, and painting, as well as exhibit space, are needed. The drama program operates from a 100-year old barn with no dedicated drama classrooms, adjoining scene shop, or improved technical theater instruction areas for students.

The new facility will provide appropriate space for the drama, visual arts, and music programs; will accommodate high enrollment growth in the drama program; and will allow growth in the music and visual arts programs. Included are 3,200 NASF for classrooms, 41,860 NASF for laboratory space, 3,680 NASF for offices, 12,400 NASF for general use, and 5,400 NASF for an auditorium and theater. The instructional center will be constructed on land currently occupied by 56,000 GSF of space in 11 temporary buildings that will be demolished. Funds for planning were appropriated in fiscal years 1999 and 2000. The total estimated cost of the project is \$32,487,800, including the following:

	<u>Prior Year Planning</u>	<u>Phase II Construction</u>	<u>Total</u>
State Funds	\$550,000	\$23,816,000	\$24,366,000
Local Fund	<u>0</u>	<u>8,121,800</u>	<u>8,121,800</u>
Total	\$550,000	\$31,937,800	\$32,487,800

Elgin Community College: Spartan Drive Extension (Site Improvements, \$1,660,000)

The College has entered into an intergovernmental agreement with the City of Elgin to provide an entrance to the campus from Randall Road, the major north/south road in the district, by extending Spartan Drive 3,900 feet. All three current entrances are off heavily traveled U.S. Highway 20, which experiences traffic congestion for several miles at the college off-ramp exit each morning. A fourth entrance will provide an alternate route and help alleviate traffic delays to students and staff traveling to and from the college each day. The project also provides for redesigning the intersection at Spartan Drive and Second Street from a curve to a "T" intersection and for repairing Second Street. The total estimated cost to the district is \$2,214,000, including \$1,660,000 in state funds and \$554,000 in local funds.

Parkland College: Student Services Center (Buildings, \$10,927,300)

In response to enrollment growth, student services offices have been relocated throughout the campus while space originally allocated for student activities has been converted to instructional and office space. In 1996 the National Center for Higher Education Management Systems assessed the needs of the College and determined space for student lounge and service, food service, and administrative services is deficient. This project provides funding to construct a 59,130-GSF addition to connect the college center and the physical education building. The addition will house a student center, testing and assessment space, offices, a food service area, meeting facilities, and support area. The addition will provide space for new student orientation, staff development, student activities, records processing and counseling. Included are 2,827 NASF for classrooms, 3,250 NASF for laboratories, 11,979 NASF for offices, 2,375 NASF for study and library space, and 15,600 NASF for general, special use, and support space. The total estimated cost of the project is \$14,569,700, including \$10,927,300 in state funds and \$3,642,400 in local funds.

Sauk Valley Community College: T-1 Building and Building One Remodeling, Storage Facility Construction (Remodeling, \$3,305,100)

This project provides for the remodeling of approximately 44,000-GSF in T-1 Building to house corporate and community services, academic programs, selected career programs, and physical education course offerings. T-1 Building, a warehouse structure, served as the temporary campus for the College during construction of the main building. It is structurally sound and is not used currently for instructional purposes. With the relocation of career programs from the west wing of Building One to T-1 Building, approximately 16,200 GSF will be remodeled to provide space for the consolidation and expansion of the fine arts program. A total of 44,000 GSF of temporary space will be made permanent with the remodeling provided by this project. The project also includes construction of a 2,400-GSF storage facility. The total estimated cost of the project is \$4,275,000, including \$3,305,100 in state funds and \$969,900 in local funds. The local funds share reflects eligible credits of \$98,100.

William Rainey Harper College: Engineering and Technology Center Renovations (Remodeling, \$14,321,100)

This project provides for the remodeling of approximately 78,500 GSF of classrooms and laboratories in Buildings "G" and "H" which were constructed in 1977. Improvements will include reconfiguring interior space to provide adaptable classrooms and laboratories and the infrastructure for new technologies and teaching methods. The project also provides for

upgrading mechanical, electrical, lighting, acoustical, heating, ventilating, and air conditioning systems. Improvements will ensure compliance with the Americans with Disabilities Act and other state codes. The total estimated cost of the project is \$19,094,800, including \$14,321,100 in state funds and \$4,773,700 in local funds.

Rend Lake College: Art Program Addition (Buildings, \$341,600)

This project provides for the construction of a 2,200-GSF laboratory addition and for minor remodeling of existing space to meet the growing needs of the art program and the reinstitution of the music and theater programs. The programs are housed in the Learning Resource Center. The total estimated cost of the project is \$455,600, including \$341,600 in state funds and \$114,000 in local funds.

Lake Land College: Rural Development Technology Center (Buildings, \$5,272,500)

The Kluthe Center for Higher Education and Technology was constructed in Effingham in 1995 to meet the needs of the College, the community, and businesses in the area. Enrollment at the facility is now at capacity. This project provides for the construction of a three-story, 36,000-GSF facility in Effingham to serve expanded programs in Speech Language Pathology Assistant, Emergency Medical Services, Desktop Publishing, and Heating, Ventilation, Air Conditioning, and Refrigeration; a laboratory for hands-on training; general education classrooms; and a maintenance area. The facility will be constructed at the same location as the Kluthe Center. Included are 7,800 NASF for classrooms, 8,000 NASF for laboratories, 2,100 NASF for offices, 2,300 NASF for study, and 5,000 NASF for general and support use. Funds are included for land acquisition, site development, and 300 additional parking spaces. The total estimated cost of the project is \$7,030,000, including \$5,272,500 in state funds and \$1,757,500 in local funds.

College of DuPage: Instructional Center Noise Abatement (Remodeling, \$1,171,700)

This project provides for the installation of acoustical ceilings and wall mounted acoustical panels in all public corridors and lounge areas of the Instructional Center to reduce noise levels and disruptions in classrooms and offices. The Center, a 413,000-GSF teaching facility completed in 1971, contains two 655-foot corridors and four 205-foot cross halls with nine foot ceilings. The walls are made of brick with wallboard, glass, and doorways. The ceilings are constructed of wallboard, and the floor is brick. The structural design and construction materials combined with the long hallways cause noise to echo down the corridors and permeate classrooms and offices. The total estimated cost of the project is \$1,411,600, including \$1,171,700 in state funds and \$239,900 in local funds. The local funds share reflects eligible credits of \$113,000.

William Rainey Harper College: One Stop/Admissions and Student Life Center (Buildings, \$29,098,700)

This project provides for the construction of a 98,622-GSF facility to centralize student services and student activities currently scattered throughout the campus and to address needs due to growth. The two-story center will be constructed adjacent to and will connect existing buildings to facilitate student traffic between buildings. A total of 63,499 NASF is available with 8,535 NASF for classrooms and laboratories, 29,401 NASF for offices, 22,429 NASF for general use space, and 3,134 NASF for special, support, and health care space. Utilities will be

extended to the building and will be modified to accommodate building requirements. Site improvements, including landscaping and sidewalks, and equipment will be provided. The total estimated cost of the project is \$34,777,300, including \$29,098,700 in state funds and \$5,678,600 in local funds. The local funds share reflects eligible credits of \$3,015,700.

Illinois Valley Community College: Community Instructional Center (Buildings, \$11,418,000)

This project provides for the construction of an 87,355-GSF facility to house enrollment services and student life space, a laboratory school for the Early Childhood Education Program and Child Care Center, the Business and Industry Training Center, and the Small Business Development Center. The Center will provide a "one-stop" location at the main entrance to the campus for meeting the needs of incoming students. Multi-purpose classrooms and seminar rooms will have the infrastructure for new instructional technologies and distance learning. Included are 4,912 NASF for classrooms, 9,600 NASF for laboratories, 11,129 NASF for offices, 1,332 NASF for study space, and 37,228 NASF for support, general use, and special use space. The facility, which will be connected to the Cultural Center and theater, will serve as the new entrance to the campus and will better connect the main and east campuses. Site improvements including roads, sidewalks, parking, and landscaping will be provided also. Some of the programs to be relocated to the new facility are housed currently in temporary buildings. Funds to renovate space vacated with the relocation of programs to the new facility will be requested in the future. The total estimated cost of the project is \$15,224,000, including \$11,418,000 in state funds and \$3,806,000 in local funds.

Lake Land College: Center for Technical Education (Buildings, \$5,773,200)

This project provides for the construction of a 35,000-GSF Center for Technical Education to house all engineering, manufacturing, and electronics programs currently scattered throughout three campus buildings. A new facility will consolidate all the program areas to provide better opportunities for interaction among students, sharing of equipment, and collaboration between instructors. Included are 6,400 NASF for classrooms, 13,100 NASF for laboratories, 4,000 NASF for study space, and 1,000 NASF for offices. A total of 200 additional parking spaces are included. Upon completion of this project, 6,000-GSF of temporary space that currently houses these programs will be demolished. The total estimated cost of the project is \$7,697,600, including \$5,773,200 in state funds and \$1,924,400 in local funds.

College of Lake County: Student Services Building (Buildings, \$31,317,000)

Existing facilities have been remodeled to accommodate enrollment growth and provide retention services, resulting in the fragmentation of areas for student services. This project provides for the construction of a 162,400-GSF student services building to coordinate and integrate student academic support systems. Included are 11,357 NASF for classrooms, 28,689 NASF for offices, 6,910 NASF for study space, and 55,386 NASF for support, special use, and general use space. When programs and services are relocated to the new facility, 53,400-GSF of existing space will be remodeled for academic programs, administrative offices, and storage. Site improvements include the extension of storm and sanitary sewers, electrical service, water mains, and building services. A new roadway, sidewalks, and 100 new parking spaces will be provided. This project will replace 61,300 GSF of temporary space. The total estimated cost of the project is \$41,756,000, including \$31,317,000 in state funds and \$10,439,000 in local funds.

Heartland Community College: Workforce Development Center (Buildings, \$12,020,700)

A new Workforce Development Center on Heartland's permanent campus site will integrate technical education for district students, provide customized training for local businesses and industries, and offer employees and employers opportunities to improve and update workforce skills. The College will locate activities conducted by its Corporate Education Division in the facility and will offer credit courses and workforce training side by side. This 78,650-GSF Center will provide 17,500 NASF for classrooms, 21,550 NASF for laboratories, 3,900 NASF for offices, 1,600 NASF of study space, and 5,050 NASF of general use and support space. A utility tunnel will be constructed to complete a redundant loop for extension of heating, cooling, and electrical service to the new building. The College currently leases 41,400 GSF of space for the programs. The total estimated cost of the project is \$16,027,600, including \$12,020,700 in state funds and \$4,006,900 in local funds.

Kaskaskia College: Child Care and Workforce Development Center (Buildings, \$7,986,900)

The College currently uses temporary facilities to house some instructional programs and the child care center. This project provides for the demolition of 18,000 GSF in four temporary buildings and the construction of a 44,120-GSF facility on the site to house the child care center; allied health programs of Physical Therapist Assistant, Dental Assisting, Respiratory Therapist, Radiologic Technology, Diagnostic Medical Sonography; other instructional programs of Cosmetology, Nail Technology, Computer Networking; a computer laboratory with three computer training classrooms, and two general use classrooms. Included are 10,000 NASF for classrooms, 11,540 NASF for laboratories, 1,870 NASF for offices, and 4,615 NASF of support, special use, and general use space. Site improvements include the addition of sidewalks and lighting. The total estimated cost of the project is \$10,817,000, including \$7,986,900 in state funds and \$2,830,100 in local funds. The local funds share reflects eligible credits of \$45,900.

Statewide

All Colleges: Capital Renewal Projects (Remodeling, \$9,107,500)

This recommendation provides for various remodeling projects at community colleges. These funds will be distributed proportionately among the community colleges based on their on-campus, nonresidential space. Throughout the year, specific projects will be identified by each district and submitted to the Illinois Community College Board for approval. The recommendation for fiscal year 2003 is \$9,107,500.

XI. UNIVERSITY CENTER OF LAKE COUNTY

Fiscal year 2003 capital recommendations for the University Center of Lake County total \$9.0 million. Table XI-1 shows the University Center of Lake County's request, and identifies the projects and amounts recommended by the Board of Higher Education in fiscal year 2003. Table XI-1 also shows the total estimated project cost, prior year funding, associated out-year costs, and the amount supported with local or private fund sources.

Regular Capital

University Center of Lake County (Buildings, \$9,000,000)

In December 1998, the Board of Higher Education adopted a plan to implement the new University Center of Lake County and approved policies establishing basic goals, objectives, and responsibilities for the new institution. In accordance with this plan, the Center offers low-cost, convenient, high quality, upper-division and graduate education to residents of the Lake County area. It is smaller in size and scope than a traditional university and saves costs by concentrating on instruction, rather than on research and/or public service, and by leveraging the resources of existing educational institutions. The Center is a collaborative institution building upon the ongoing activities of 11 public and private institutions that joined together under a regional multi-university center, created in 1997. The Center promotes and supports program efforts, but does not award degrees or employ faculty. Member institutions assume these responsibilities. It is estimated that the Center will have 3,000 to 5,000 students in about five years.

In fiscal year 2000, the Governor proposed and the General Assembly approved \$11,000,000 for construction of a facility to house the University Center of Lake County. Initial planning called for these state capital funds to be matched with local funds for the University Center's \$22,000,000 estimated cost. As part of the planning process for the new facility, focus groups identified the building components and capabilities necessary to meet the instructional needs of the programs housed in the Center. These groups identified the need for more state-of-the-art technologies than originally planned.

In May 2000, the Board of Higher Education decided that the main facility for the Center should be located at the College of Lake County campus in Grayslake and that a satellite facility should be established in downtown Waukegan. This decision followed a period of extensive consultation that resulted in a delay in the naming of the Center's location. The Board of Higher Education appointed members to the University Center Board on June 2000.

This project provides for the construction of an 80,000-GSF central facility with access to the Illinois Century Network and to multiple instructional sites using interactive two-way video. The Center will house classrooms to meet the projected demand, computer laboratories, library services, student services, and administrative services. Nearly \$6,700,000 have been raised from other sources: \$3,000,000 from the Lake County Board and \$3,681,040 in federal grants. The College of Lake County donated land valued at \$3,000,000 on its Grayslake campus for the site of the new institution. Contributions from private donors for construction have not been realized; however, their support of scholarship programs is expected.

Due to inflation and the inclusion of more state-of-the-art technologies than originally planned, the estimated cost of the project is now \$26,843,000. Additional state funding of \$9,000,000 is recommended for the construction of the Center.

XII. ILLINOIS MATHEMATICS AND SCIENCE ACADEMY

Fiscal year 2003 capital budget recommendations for the Illinois Mathematics and Science Academy total \$11.0 million. Table XII-1 provides a list of the projects the Illinois Mathematics and Science Academy requested for funding and identifies the projects and amounts recommended by the Board of Higher Education in fiscal year 2003. Table XII-1 also shows for each project the total estimated project cost, prior year funding, associated out-year costs, and the amount supported with local or private fund sources. A narrative description of the projects recommended for funding in fiscal year 2003 follows.

Regular Capital

Mezzanine Renovation and Expansion (Remodeling, \$5,943,800)

The Illinois Mathematics and Science Academy facility was constructed in 1976 and was occupied by the Academy in 1986. This project provides for constructing and equipping a mezzanine level in the east gymnasium to provide 26,400 GSF for the Academy's external service programs. The east gymnasium is one of three originally constructed gyms and is utilized currently only for storage. The mezzanine will house the expanded "Center @ IMSA" for professional development for teachers and programs for other Illinois students, including the Kids Institute and Excellence 2000 training operations. Offices, laboratories, and instructional space will be provided. An unfinished area on the first level of the east gymnasium will continue to be utilized for storage. Also included is the reconfiguration of the southeast entrance to the academic building to identify it as the entrance to the external service programs. The total estimated cost of the project is \$7,943,800, including a fiscal year 2002 appropriation of \$2,000,000 to plan and begin the remodeling.

Laboratory Remodeling and Expansion (Remodeling, \$5,028,200)

This project provides for the modernization of existing laboratories and reconfiguring of space to create additional laboratories. Eight laboratories on the second floor will be demolished to their structural shells and will be replaced with six larger laboratories, offices, and discussion areas. The B-Wing laboratories and adjacent classrooms, except the Tellabs studio, also will be demolished and reconfigured to provide multi-functional laboratory centers to meet the needs of the Scientific Inquiries program, including a technology design studio for student-developed products and services. Improvements will include replacement of casework, counters, cabinets, and related plumbing, piping, and electrical and data services. Existing lighting will be modified. Fume hoods will be replaced and new fume hoods installed with modifications to the heating, ventilating, and air conditioning system. Gas service, water and waste piping, and electrical modifications and distribution will be provided for fume hoods, new flexible casework, and equipment. Telecommunication distribution and outlets for computers and data equipment will be provided at each workbench station. Interior finishes will be upgraded, and the availability of safety measures will be ensured. Asbestos abatement is included. Also included is the scientific equipment and furnishings for these laboratories.

FISCAL YEAR 2003 PRIORITY LIST
HIGHER EDUCATION CAPITAL IMPROVEMENTS*

(in thousands of dollars)

BHE Priority FY02	FY03	Institution Priority		Institution	Project	Recommendation		Cumulative	Explanation of Priority
		FY02	FY03			\$	\$		
1	1			Statewide	Capital Renewal (includes \$10,000.0 Build Illinois Bond Funds)	30,000.0	30,000.0		This includes the fourth year of a five year, \$50.0 million Illinois FIRST commitment through Build Illinois.
2	1			University Center of Lake County	University Center of Lake County Construction	9,000.0	39,000.0		Recommended funds are necessary to complete the building and purchase equipment. In fiscal year 2000, \$11.0 million were appropriated for this project.
13	3	4	1	Lake Land College	Student Services Building Addition	6,721.6	45,721.6		This is the first project from the fiscal year 2002 Community College Board list which was not funded in fiscal year 2002.
21	4	2	1	Northeastern Illinois University	Buildings "A," "B," and "E" Remodeling	3,740.0	49,461.6		Recommended funds will be used to purchase equipment to complete the project. Funds for remodeling were appropriated in fiscal year 2000.
5	1			Eastern Illinois University	Fine Arts Center Renovation and Expansion	7,500.0	56,961.6		Recommended funds will be used to purchase equipment to complete the project. Planning and construction funds were appropriated in fiscal years 2000, 2001, and 2002. The construction funds for the project were the Board's #7 priority in fiscal year 2002.
26	6	4	2	University of Illinois at Springfield	Classroom Office Building	15,000.0	71,961.6		Recommended funds will be used to complete the building and purchase equipment. Planning and construction funds totaling \$16.3 million were appropriated in fiscal years 2001 and 2002.
31	7	2	1	Chicago State University	Convocation Center	3,000.0	74,961.6		Recommended funds will be used to purchase equipment to complete the building. Prior appropriations for the project total \$25 million.
36	8	2	2	Northern Illinois University	College of Business Building, Barsema Hall	4,930.0	79,891.6		Recommended funds will be used to purchase equipment to complete the building for which a \$20 million gift was received to construct.
9	4			Southern Illinois University Carbondale	Altgeld Hall and Old Baptist Foundation Renovation and Addition	1,000.0	80,891.6		Recommended funds will be used to purchase equipment to complete the project. Funds for remodeling were appropriated in fiscal years 1998 and 2001. Occupancy is anticipated in January 2003.

Table A - 9
FISCAL YEAR 2003 PRIORITY LIST
HIGHER EDUCATION CAPITAL IMPROVEMENTS*

(in thousands of dollars)				Institution	Project	Recommendation	Cumulative	Explanation of Priority
BHE Priority	Institution Priority							
FY02	FY03	FY02	FY03					
45	10	2	1	Illinois Mathematics and Science Academy	Mezzanine Renovation and Expansion	\$ 5,943.8	\$ 86,835.4	Recommended funds will be used to complete the project. A total of \$2 million was appropriated in fiscal year 2002. The Academy switched the priority of its two capital requests in recognition of the commitment by the Governor and General Assembly.
11	1	1	1	Southern Illinois University Carbondale	Morris Library Renovation and Addition	25,690.0	112,525.4	A total of \$1.9 million was appropriated in fiscal year 2002 for planning and initial equipment. The planning was BHE's #12 priority in fiscal year 2002.
12	9	3	3	University of Illinois at Urbana-Champaign	Lincoln Hall Remodeling	46,000.0	158,525.4	BHE's priority #15 in fiscal year 2002 was the Urbana campus chiller project. The University is using internal funds to do the chiller. The priority was given to the University's next fiscal year 2003 priority project.
14	13	2	2	Southern Illinois University Edwardsville	Science Laboratory Building Renovation and Expansion	1,714.0	160,239.4	Initial planning funds were appropriated in fiscal year 1999.
17	14	5	2	Triton College	Technology Building Rehabilitation	7,435.0	167,674.4	Community College Board priority list for fiscal year 2003 and BHE priority list for fiscal year 2002 are followed.
18	15	6	3	Joliet Junior College	Utilities Renovation	3,160.5	170,834.9	Community College Board priority list for fiscal year 2003 and BHE priority list for fiscal year 2002 are followed.
20	16	2	1	Illinois State University	Life Safety Improvements - Stevenson and Turner Halls	21,500.0	192,334.9	BHE priority list for fiscal year 2002 is followed.
22	17	3	3	Southern Illinois University Carbondale	Communications Building Renovation and Addition	4,753.7	197,088.6	BHE priority list for fiscal year 2002 is followed.
24	18	8	4	Morton College	Building Structural Repair	3,951.7	201,040.3	Community College Board priority list for fiscal year 2003 and BHE priority list for fiscal year 2002 are followed.
25	19	9	5	Rock Valley College	Arts Instructional Center	23,816.0	224,856.3	Community College Board priority list for fiscal year 2003 and BHE priority list for fiscal year 2002 are followed.
20		3	1	Western Illinois University	Convocation Center Planning	4,566.9	229,423.2	This project is new to the Board's list in fiscal year 2003.

Table A - 9

**FISCAL YEAR 2003 PRIORITY LIST
HIGHER EDUCATION CAPITAL IMPROVEMENTS***

(in thousands of dollars)				Institution	Project	Recommendation	Cumulative	Explanation of Priority
BHE Priority FY02	BHE Priority FY03	Institution Priority FY02	Institution Priority FY03					
40	21	3	1	Northern Illinois University	Stevens Building Renovation and Addition (Planning)	\$ 1,477.2	\$230,900.4	Planning for this project is accelerated. Funds to renovate are at priority #32. This project was requested as early as fiscal year 1993.
27	22	10	6	Elgin Community College	Spartan Drive Extension	1,660.0	232,560.4	Community College Board priority list for fiscal year 2003 and BHE priority list for fiscal year 2002 are followed.
28	23	11	7	Parkland College	Student Services Center	10,927.3	243,487.7	Community College Board priority list for fiscal year 2003 and BHE priority list for fiscal year 2002 are followed.
29	24	12	8	Sauk Valley Community College	T-1 Building and Building One Remodeling; Storage Facility Construction	3,305.1	246,792.8	Community College Board priority list for fiscal year 2003 and BHE priority list for fiscal year 2002 are followed.
30	25	13	9	William Rainey Harper College	Engineering and Technology Center Renovations	14,321.1	261,113.9	Community College Board priority list for fiscal year 2003 and BHE priority list for fiscal year 2002 are followed.
32	26	14	10	Rend Lake College	Art Program Addition	341.6	261,455.5	Community College Board priority list for fiscal year 2003 and BHE priority list for fiscal year 2002 are followed.
34	27	15	11	Lake Land College	Rural Development Technology Center	5,272.5	266,728.0	Community College Board priority list for fiscal year 2003 and BHE priority list for fiscal year 2002 are followed.
35	28	5	6	University of Illinois at Chicago	Roof and Window Replacement and Masonry Repairs	16,000.0	282,728.0	BHE priority list for fiscal year 2002 is followed.
37	29	2&3	2	Eastern Illinois University	Chilled Water Loop and Electrical Distribution System Upgrade	5,600.0	288,328.0	The chilled water loop was BHE's #37 priority in fiscal year 2002. The chilled water loop and electrical upgrade are combined in fiscal year 2003.
38	30	16	12	College of DuPage	Instructional Center Noise Abatement	1,171.7	289,499.7	Community College Board priority list for fiscal year 2003 and BHE priority list for fiscal year 2002 are followed.
31		13	13	William Rainey Harper College	One Stop/Admissions and Student Life Center	29,098.7	318,598.4	This project substitutes for the Science Center which was BHE's priority #39 (ICCB's priority #17) in fiscal year 2002. Harper will use local funds to construct the science center.
40	32	3	1	Northern Illinois University	Stevens Building Renovation and Addition	15,332.5	333,930.9	BHE priority list for fiscal year 2002 is followed. Planning for the project has been accelerated as a separate project.
